CATALOGUE

... OF ...

SASH, DOORS, BLINDS, STAIR WORK, ETC., ETC.

LONG DISTANCE TELEPHONE, 1143.

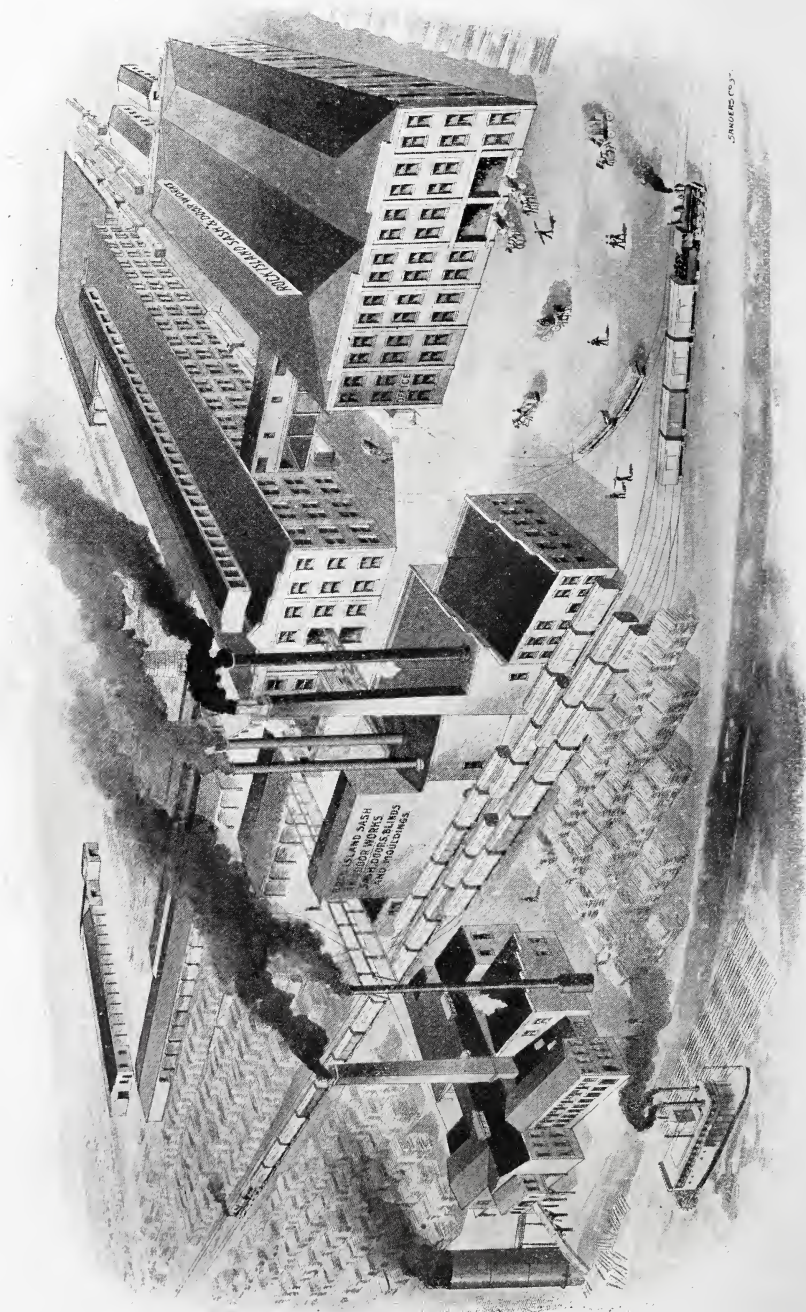

CABLE ADDRESS—"REVEALERR" ROCK ISLAND.

A. B. C. CODE USED. 4TH EDITION.

NOTICE: In ordering or making inquiry on special cuts or designs shown in other than our Catalogue, simply refer by number, "stating whose book," as we have in our office copies of every book published.

Entered according to an Act of Congress, in the year 1902, by ST. LOUIS SASH AND DOOR WORKS, in the office of the Librarian of Congress at Washington.

OUR ROCK ISLAND PLANT.

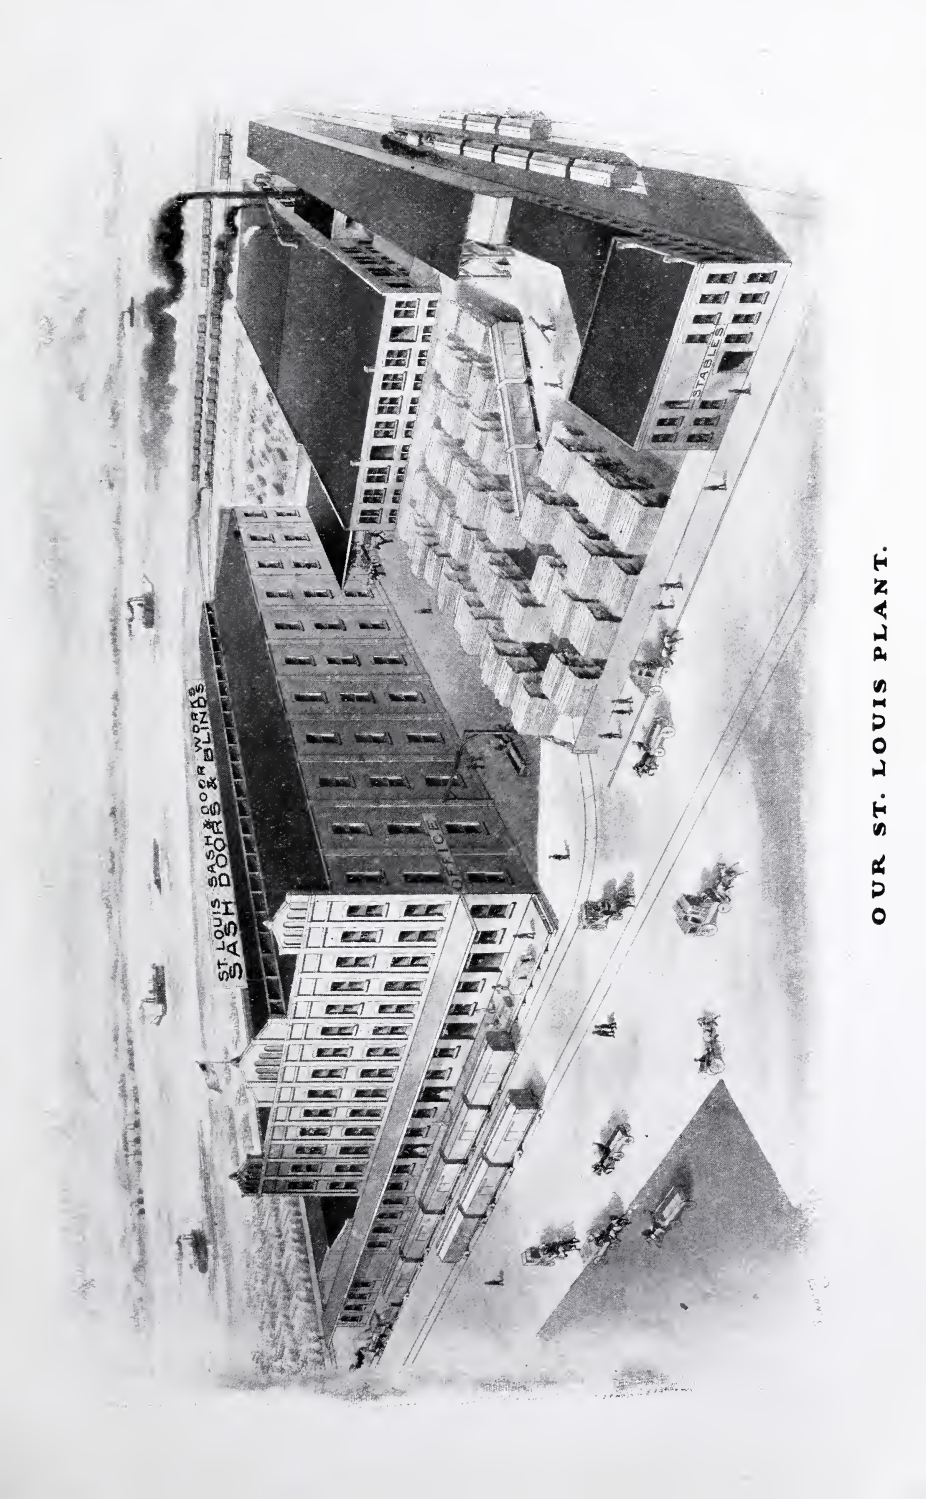

STANDARD CO.

ST. LOUIS SASH, DOOR & BLIND CO.

OFFICE

STABLES

OUR ST. LOUIS PLANT.

Above views pertain to lumbering as carried on by the Weyerhaeuser interests on the great Mississippi River and its tributaries. The steamer **Rutledge**, belonging to our stockholders, is en route to our mill plant in Rock Island.

..TO THE TRADE..

IN PRESENTING to you herewith our new complete 1902 Catalogue, we call your attention especially to the many new and modern styles and designs, which are shown in this book exclusively.

A great many customers not familiar with the business are led to believe that all listed items are carried in stock by wholesalers. This would be impracticable, and very expensive to the wholesaler, and therefore we have printed all prices of such items that we carry in stock, or are prepared to ship within a short time, **in heavy type**. This will no doubt be a great help to you in determining as to whether you can get a certain item at once or not.

In conjunction with this, we recommend the free use of our telegraph code for all stock items, so that in telegraphing your orders you can get stock items that we will agree to ship promptly upon receipt of telegram, as fast as the trains will bring them to you.

All items that are listed and not printed in heavy type, we are prepared to turn out on short notice.

We have made numerous improvements in this issue over our 1900 Catalogue, amongst which we will merely quote, that we have priced all odd work as nearly as possible. In which connection we wish to state that we will, at all times, give your Open Mail Orders the benefit of any inducements we may be able to offer on account of character of order.

Our stock goods being all manufactured in our factory at Rock Island, affords you the benefit of uniform make in ordering from us, and you are sure to get at all times, bright, clean and newly manufactured work.

Hoping to have you call on us when in the City, we are,

Yours truly,

Rock Island Sash and Door Works.

TELEGRAPH CODE

WE find that some of our customers use our Telegraph Code, in sending their urgent orders for stock items printed in **heavy type**, to quite an extent, at the same time we have received, at times, inquiries requesting some explanation as to its use and we, therefore, quote here-with an example which will make it plain to you how to use this Code to advantage:

Always, in sending a telegram, first write the message out plain at full length and then, in abbreviating the message, use the Code Words given opposite the size in the Catalogue; for example—

ROCK ISLAND SASH AND DOOR WORKS,

Rock Island, Ill.

Ship—

50 Windows, 10 x 12, 8 lts. $1\frac{1}{8}$ plain rail glazed.
 50 Windows, 10 x 12, 12 lts. $1\frac{3}{8}$ check rail glazed.
 20 Doors 2 ft. 6 in. x 6 ft. 6 in., $1\frac{1}{8}$ B Grade.
 15 Doors 3 ft. 0 in. x 7 ft. 0 in., $1\frac{3}{8}$ C Grade.
 500 ft. No. 8066 White Pine.

Reduced to our Code, would read as follows—

Ship—

Fifty Maintain.	Fifty Mollify.	Twenty Repass.
Fifteen Revere.	Five Hundred Barrack.	

Any orders you may send, using this Code, by wire, we will authorize you to send **COLLECT**, we paying the charges.

In this connection we recommend, on important inquiries, the use of the **long distance telephone**, which we have in our office.

Hoping you will make frequent use of this code, we are,

Yours truly,

Rock Island Sash and Door Works.

Official Grades on Windows.

Adopted by the Wholesale Sash, Door and Blind Manufacturers' Association
of the Northwest.

Check Rail Windows may contain two (2) knots three-eighths ($\frac{3}{8}$) inch in diameter or one red knot five-eighths ($\frac{5}{8}$) inch in diameter in each piece of a window. White sap and not over thirty-three and one third ($33\frac{1}{3}$) per cent. blue sap may be admitted in any one window. Workmanship must be good.

Plain Rail Windows and Sash may contain blue sap and small knots.

DIRECTIONS FOR ORDERS OR INQUIRIES.

Special Notice

In giving sizes, always state width first. This applies to all goods in our line.

A Sash indicates one piece; one pair of Sash, two pieces. The term Window refers usually to two pieces, unless cut referred to shows more than two pieces.

Plain Rail Sash.

Pages 12-14.

State the size of glass and number of lights in window. We will furnish them $1\frac{1}{8}$ inch thick, glazed unless otherwise ordered. We carry a large stock of the regular selling sizes on hand of these, as priced in **heavy figures**, and can ship them at once upon receipt of order. Use telegraph code at our expense when in urgent need of any stock sizes.

Check Rail Sash.

Pages 14-21.

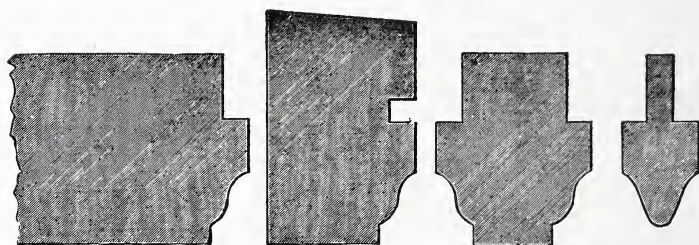

Give number of lights and thickness. Unless otherwise ordered, we send them glazed, single strength, $1\frac{3}{4}$ inch thick. We have all the regular sizes in stock, as priced in **heavy figures**, and can ship upon receipt of order. Use telegraph code at our expense when in urgent need of any stock sizes.

Circle and Segment Top Windows.

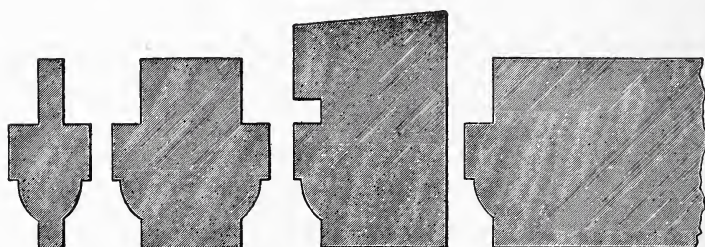

Page 11.

These Windows are not carried in stock, but we are prepared to turn them out at once. We can fill the various figures shown with any number of lights desired. Give sizes and number of lights and thickness of Sash. Unless otherwise ordered, we send them glazed, single strength, $1\frac{3}{8}$ inch thick. Figures 3 and 4 we will construct with regular radius, which is width of Sash, unless otherwise ordered. Always state whether they are wanted to finish circle or segment inside and outside, like Figures 1 and 3, or to finish circle or segment on outside only, as Figures 2 and 4, on same page; also, where frames are made, we should have width and height of frame in the clear, and if not regular Western sizes, give size of openings.

Cuts of Sash Stickings.

107

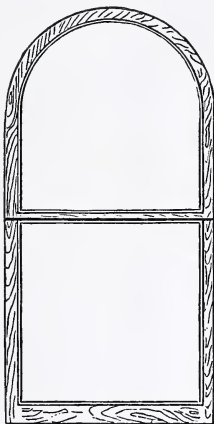

106

103

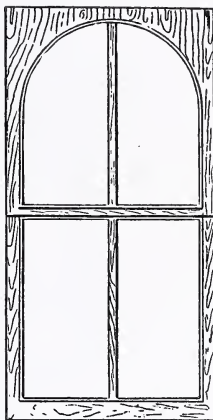

We furnish any style of Sticking required by the different markets, but carry only No. 106 in stock.

Circle and Segment Top Windows.

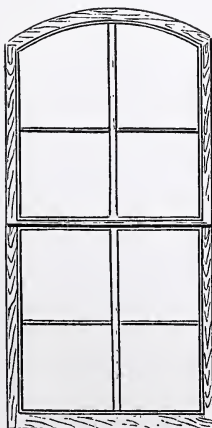

1

**For Window Frames Circle
inside and outside.**

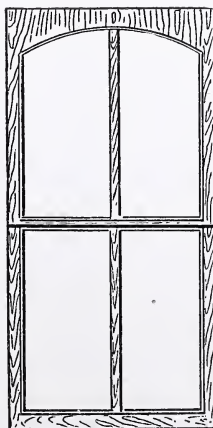

2

**For Window Frames Circle
outside, Square inside.**

3

**For Window Frames
Segment inside and outside.**

4

**For Window Frames
Seg. outside, Square inside.**

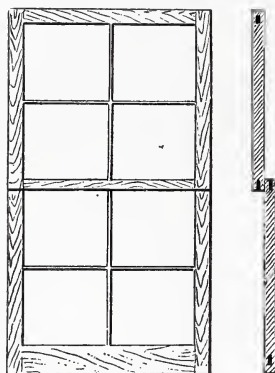

See additional list prices under Sash Extras, page 43.

Plain Rail Windows.

Eight Lights, $1\frac{1}{8}$ -Inch Thick.

Fifteen and Eighteen Light Windows.

Plain or Check Rail.

For 15-Light Windows Unglazed, add to open list of 12-Light one-third.
 For 18-Light Windows Unglazed, add to open list of 12-Light two-thirds
 For 15-Light Windows Glazed, add to glazed list of 12-Light one-quarter
 For 18-Light Windows Glazed, add to glazed list of 12-Light one half.

Check Rail Windows.

Sectional cut of Check Rail Windows, plowed and bored.

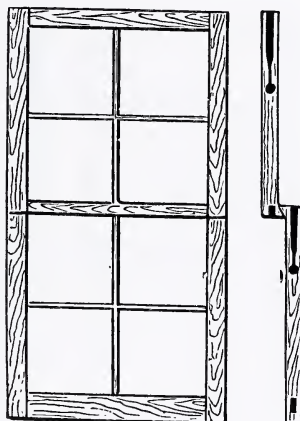

We show above the manner in which we plow and bore all our check rail Sash.

The Sash are dressed on outside of stiles, which reduces the cost of fitting them into frames to a minimum.

The Tenon of check rail in Plow does not project into plow as shown, which fact again reduces much in the labor of fitting the Sash.

Check Rail Windows.

In telegraphing, if Windows are wanted Glazed with Double Strength Glass, add to Code of Single Strength Windows the word "Double."

Open Windows made for glass 11 inches wide, same price as 12 inches.

Open Windows made for glass 13 or 13 $\frac{1}{2}$ inches wide, same price as 14 inches.

All Check Rail Windows plowed and bored.

1 $\frac{3}{8}$ inches Plain Rail Windows same price as 1 $\frac{3}{8}$ inch Check Rail Windows.

For Windows prepared for oil finish, add 20% to the Open list.

For Windows 1 $\frac{3}{4}$ inches thick, add 50% to list of 1 $\frac{3}{8}$ inch Open Windows.

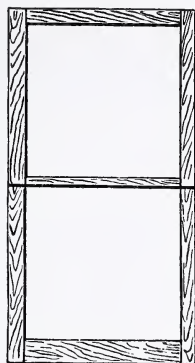

When ordering Windows always say if wanted Glazed or Open.

Sizes not listed, extra price.

N. B.—In figuring percentage as above when fractions are 5 mills or more, call it one cent; if less than 5 mills omit.

Use Telegraph Code at our expense in ordering above windows, see page 8.

Storm Sash.

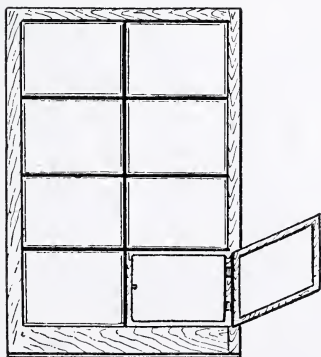

50

**Two Light Storm Sash
Ventilator open.**

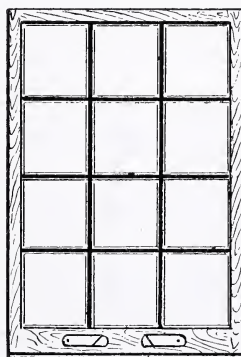

51

**Four Light Storm Sash
Ventilator closed.**

52

**Eight Light Storm Sash
Swing Light Ventilator.**

53

**Twelve Light Storm Sash
Double Ventilator.**

Storm Sash are made same width and one inch longer than check rail windows.

Price on $1\frac{1}{8}$ inch thick storm sash, same as $1\frac{3}{8}$ inch check rail windows with same number of lights and glass size.

Price on $1\frac{3}{8}$ inch thick storm sash, add 15 per cent. to $1\frac{3}{8}$ inch check rail windows with same number of lights and glass size.

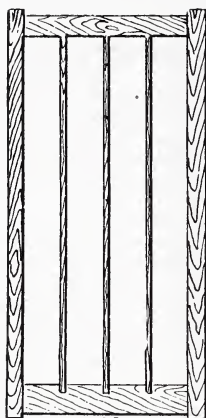

For ventilators in top or bottom rail add 10 cents net for each ventilator.

For swing light, as in 52, add 40 cents net.

When ordering state thickness, and if to be made wider than usual, state opening size or outside measurement.

Hot-Bed

Queen Anne Windows.

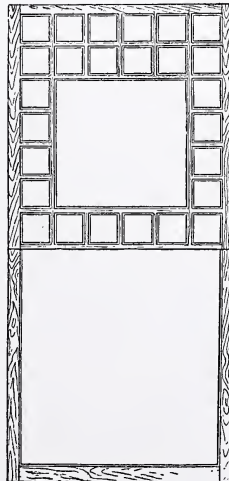

82

84

86

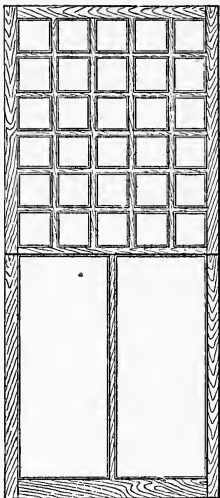

88

These Windows are usually glazed with plain glass in bottom sash, and colored glass in small lights of top sash, although plain glass in small lights looks very tasteful. Our glaziers use the very best taste in composition of colors in small lights, and if you leave the arrangement and selection to us, you are sure to be pleased.

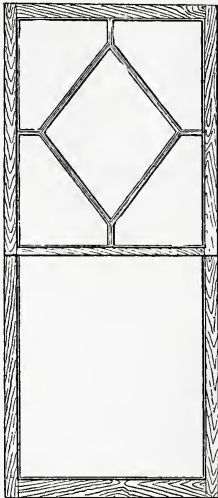

Orders should state thickness, outside measurement of entire opening, and number of cut.

For List Prices see page 38.

Oriel Front Sash and Transoms.

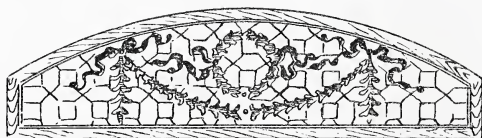

These Sash and Transoms are very handsome and relieve the monotony of a straight front very much.

133-A

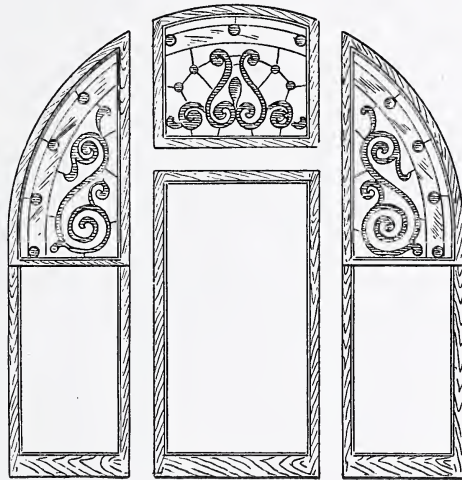

On account of the fact that they afford much light, they are very desirable for any house. The leaded glass shown in the Transoms of the various openings offer merely suggestions for the glazing. We can glaze them, however, to suit any taste, and will say that they can also be glazed with plain glass, colored glass or marginal lights in upper part with large center light. For colored glazing suggestions see Supplement to this Catalogue. Be explicit in stating your wants in this direction and give us size and thickness of sash wanted. We have special facilities for turning out suitable frames for these openings either for brick or frame houses, as shown on pages

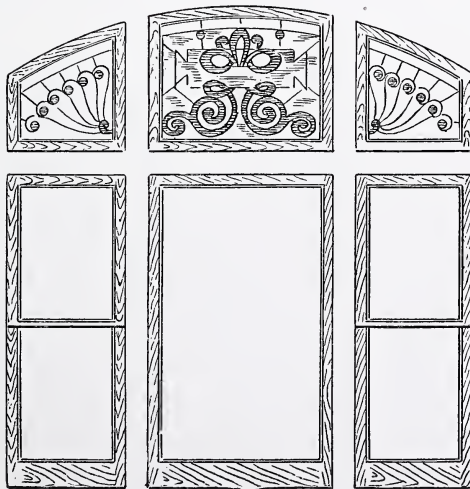

134-A

180 and 196, and shall be pleased to furnish prices upon application.

Church Window.

157

Price for an opening 5 ft. 6 in. x 12 ft. 0 in., with Frame for either Brick or Frame House, $1\frac{3}{4}$ thick Sash, glazed Leaded Glass, No. 54, as shown on Supplement, **\$105.00.**

Price subject to discount. Other size openings proportionate to above.

Church Window.

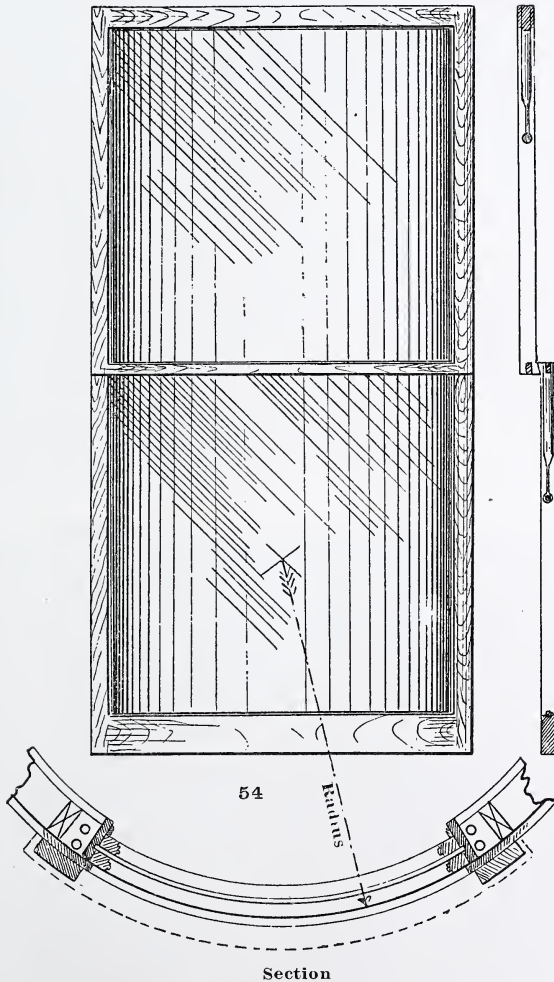

158

Price for an opening 7 ft. 0 in. x 11 ft. 6 in. with Frame for either Brick or Frame House, $1\frac{3}{4}$ thick Sash, glazed Leaded Glass, No. 64, as shown on Supplement, **\$185.00.**

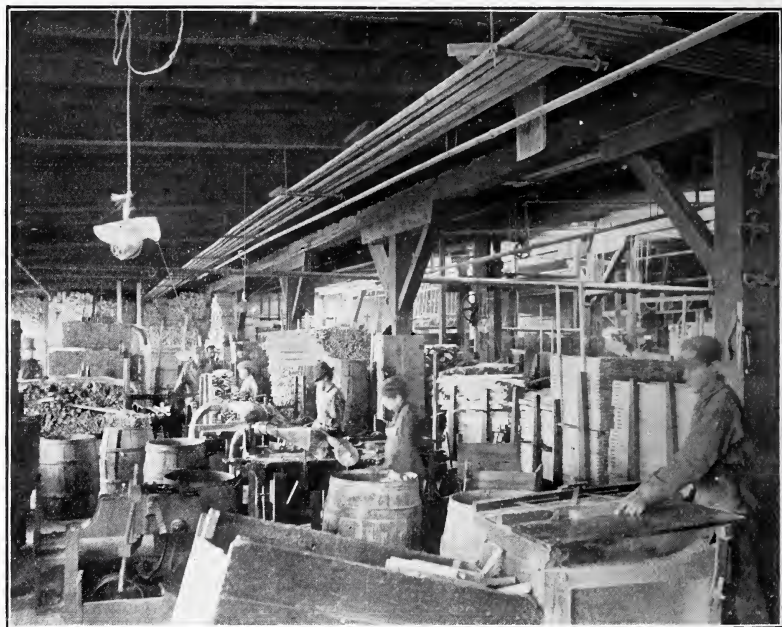

Price subject to discount. Other size openings proportionate to above.

Concave or Bent Window.

These Windows are used very largely of late in any modern house. We are prepared to turn them out with the utmost dispatch, and at the lowest going prices. Orders should give height of glass, also width of glass on surface, and the radius as taken from the outside of top sash to center of circle. If frames are already made, inquiries and orders should give a section of the frame, as shown. We have special facilities for turning out frames for such windows for either brick or frame houses, and can make the frames with parallel pulley stiles or converging pulley stiles.

Quantity affects prices. Submit list of requirements for prices.

Output April 2, 1902—1356 pair.	Output April 4, 1902—1473 pair.	

Official Grades of Doors.

Adopted by the Wholesale Sash, Door and Blind Manufacturers' Association of the Northwest.

AAA. Oil Finish Doors—Material for AAA. Oil Finish Doors must be Clear, no white sap admitted. Workmanship must be good.

AA. Oil Finish Doors—Material for AA. Oil Finish Doors must be Clear, with the exception that white sap will be admitted, not to exceed twenty-five (25) per cent of the face of any one piece. Workmanship must be good.

A Doors—Material in A. Doors must be Clear, with the exception that water stains and small pin knots not exceeding one fourth ($\frac{1}{4}$) inch in diameter may be admitted. No piece to contain more than two (2) such defects and no door more than five (5) such defects on each side; white sap not considered a defect. Workmanship must be good.

B Doors—Material in B. Doors may contain knots not to exceed one (1) inch in diameter, and blue sap showing on both sides not to exceed fifty (50) per cent in any one piece of the door and gum spots showing on one (1) side of a piece only and other slight defects, shall not exceed ten (10) in number on each side and each white pine stile, bottom and lock rail must contain at least one (1) one and not to exceed three (3) such defects; plugs admitted and not regarded as a defect. Slight defects in workmanship admitted.

C Doors—Material in C. Doors may contain all stained sap and small worm holes and fine shake; also knots not exceeding one and three fourths ($1\frac{3}{4}$) inches in diameter. Twenty (20) defects may be allowed on each side, also slight defects in workmanship. Each piece of white Pine in a No. C. Door must contain a defect. Not more than six (6) defects allowed in any one piece.

D Doors—D Doors are regarded as a cull door and must contain large coarse knots and may contain rot-worm holes, shake and other serious defects. (For prices see Price Guide.)

A Standard Door may be through tenon, blind tenon or doweled.

We show on page 62 half-tone cuts of three (3) qualities of Doors referred to above, and beg to say, in this connection, that we make our grades a great deal better than the official grading rules given above would permit us to.

Our grading department in our factory is one of the features that we take special pride in; each piece passed upon by a competent man before it is assigned to a certain grade, and as these men have an experience extending over a large number of years, it will be plain to you that in buying of us you will always get uniform quality as far as at all possible.

In dealing with a distributor, who does not manufacture his own goods, you are, on the other hand, apt to get different grades and makes at different times, hence, as uniformity is much to be desired, you will readily see that it is to your interest to deal with us as wholesale manufacturers.

As a matter of interest, we beg to make the following statement: In Europe, especially in England, where we have done a large amount of trade, we sell C Doors almost exclusively, the argument being that a C Door of high quality, as we make same, after being painted and varnished, is as good as an A or B. Door.

As far as this argument is concerned would say that we positively think it is a sound one, and we do not see why, in medium priced houses where painted work is required, C Doors will not fill the bill as well as A and B Doors. They are certainly better than doors made out of Yellow Pine or other lumber which has not the well known merits of White Pine.

Our Dowel Doors.

In order to explain the merits of our Dowel Doors we find it necessary to dwell briefly upon the manufacture of same.

These doors have **Twenty Hardwood Dowels each**, as shown in cuts on next page, which are manufactured out of thoroughly seasoned hardwood, such as Oak, Elm or Ash. After these Dowels have been manufactured on a special machine, they are inserted into the holes that have been bored into the rails, after glue has been injected into the bore holes of these rails. These Dowels fit so closely into these holes that it is necessary for the Dowels to have a groove, through which the air escapes when the Dowels are driven into the rails. After the rails are thus prepared (see cut on other page), having four Dowels in each top rail, and eight Dowels in each bottom and lock rail, the Dowels and the short shoulders of the rails are again dipped into glue, ready to be clamped together on a steam power clamp as shown in cuts on other page.

For our doors, which are constructed in the manner described above, we claim the following advantages:

That they are far superior to so-called blind tenon doors, which go into the stiles only about two inches.

That they are far superior to blind tenon and patent wedged doors.

That they are far superior to doors made in the old mortised and tenoned through construction.

That our doors are far superior to Dowel Doors with but sixteen or fourteen dowels.

That our doors have no softwood dowels, which are made out of scraps of White Pine accumulated in the factory, but that our door has guaranteed **Twenty Hardwood Dowels** to each door, and that these doors are practically softwood doors with hardwood joints, in which the glue joints are not exposed to the weather, and that this door is the most perfect door that modern machinery and science can produce.

We shall be pleased to furnish to our customers, free of charge, a section of bottom rail, showing the construction plainly.

Directions for Orders or Inquiries for Doors

Should state the following:

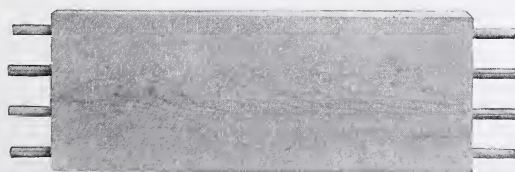

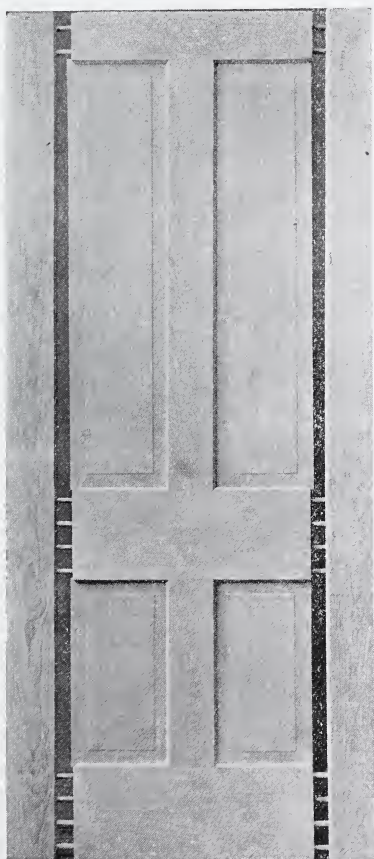

Number of panels, quality, thickness, size of door, and number of cut in book.

If doors are finished on one side different than on the other side, orders or inquiries should so state.

Unless so ordered, we will make doors out of White Pine.

For grades of doors see page 59.

SPECIAL FRONT DOORS.

We show on the following pages our Special Front Doors that we manufacture in large quantities at one time, and are in consequence able to put them in at an extremely close price. These Special Front Doors are given, on account of their beauty and low price, the preference over the old style cottage doors, which are not carried in stock by anybody, and which in consequence can not be shipped as promptly, nor be furnished at as low prices as our patterns. The designs are gotten up with a view of furnishing something that will look elaborate and at the same time be cheap.

GLAZING.

We glaze these Front Doors, as shown in the various cuts, either with Plain Glass, Chipped Glass, Sand Blast Glass, or Leaded Glass. We also show the very latest fad in Sand Blast Glazing, as shown in I X L Nos. 11, 13, 14 and 16 Doors, called **Battenberg** lace pattern, which reproduces this celebrated lace in every detail. Try a few of these as they are bound to sell. In giving your orders, please be explicit to state what you want.

QUALITY.

We make all the I X L Doors in strictly A Quality. Nos. 191, 192 and 192½ Doors, also the Rival Door, are made in B Quality. The Grained Front Doors are, of course, made in cheap quality, suitable for graining.

For prices on these Doors, see our regular Price Guide.

We show above good selling and inexpensive Front Doors, made in B quality. The sticking on these doors resembles flush moulding, and as the prices we quote thereon are extremely low, we solicit your liberal orders for them. In sending us your order, we should appreciate to have you order two of each size. For net prices, see Price Guide. For Telegraph Code, see page 102.

Stock Veneered Quarter Sawed Oak Front Doors.

IXL No. 20

IXL No. 21

Realizing that the trade would appreciate a stock hardwood Front Door at a low price, we have put on the market two handsome styles, as shown above.

We are prepared to glaze these Double-Strength, Sand Blast, like shown in IXL No. 7 Door, or Beveled Plate, and keep the following sizes on hand for prompt shipment in Veneered Quarter-Sawed Oak:

2	8	x	6	8.....	1 $\frac{3}{4}$
2	10	x	6	10.....	1 $\frac{3}{4}$
3	0	x	7	0.....	1 $\frac{3}{4}$
3	0	x	7	6.....	1 $\frac{3}{4}$

For net prices, see Price Guide.

Grained and Painted Panel Doors.

200—Grained Panel Door.

201—Grained Panel Door.

We show herewith **Two Oak Hand-Grained Doors**. These doors have two coats of paint, and are then grained imitation quartered-sawed Oak by hand (not cheap stencil or roller work) and are the best grained doors on the market.

PAINTED DOORS. We furnish these same doors painted with two coats of pure steel gray color paint, the second coat containing varnish, which gives the doors a handsome egg-shell finish.

We bundle these doors for shipment to distant points and keep continually the following sizes on hand:

No. 200—

- 2 ft. 0 in. x 6 ft. 0 in. $\frac{7}{8}$ in.
- 2 ft. 6 in. x 6 ft. 6 in. $\frac{7}{8}$ in.
- 2 ft. 6 in. x 6 ft. 6 in. $1\frac{1}{8}$ and $1\frac{3}{8}$ in.
- 2 ft. 8 in. x 6 ft. 8 in. $1\frac{1}{8}$ and $1\frac{3}{8}$ in.
- 2 ft. 10 in. x 6 ft. 10 in. $1\frac{1}{8}$ and $1\frac{3}{8}$ in.
- 3 ft. 0 in. x 7 ft. 0 in. $1\frac{1}{8}$ and $1\frac{3}{8}$ in.

4

No. 201—

- 2 ft. 6 in. x 6 ft. 6 in. $1\frac{3}{8}$ in.
- 2 ft. 8 in. x 6 ft. 8 in. $1\frac{3}{8}$ in.
- 2 ft. 10 in. x 6 ft. 10 in. $1\frac{3}{8}$ in.
- 3 ft. 0 in. x 7 ft. 0 in. $1\frac{3}{8}$ in.

If Nos. 210, 211, 212 and 213 Sash Doors are wanted, Painted, add the word "Painted" to code word; if wanted Grained, add the word "Grained" to code word given.

Use Telegraph Code at our expense, see page 8.

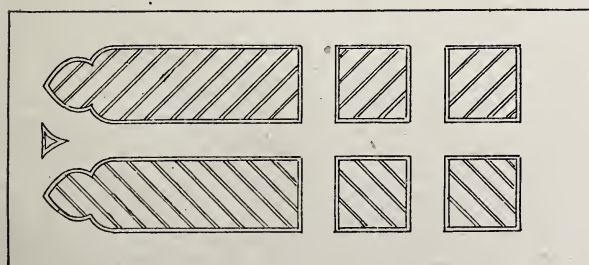

Church Doors.

161

160

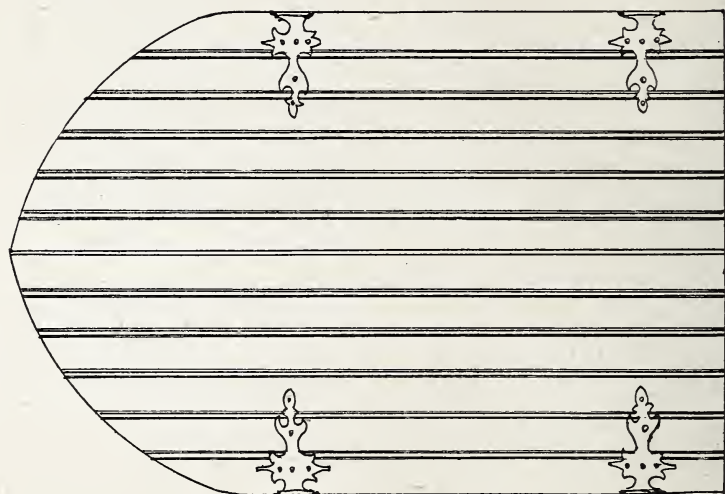

159

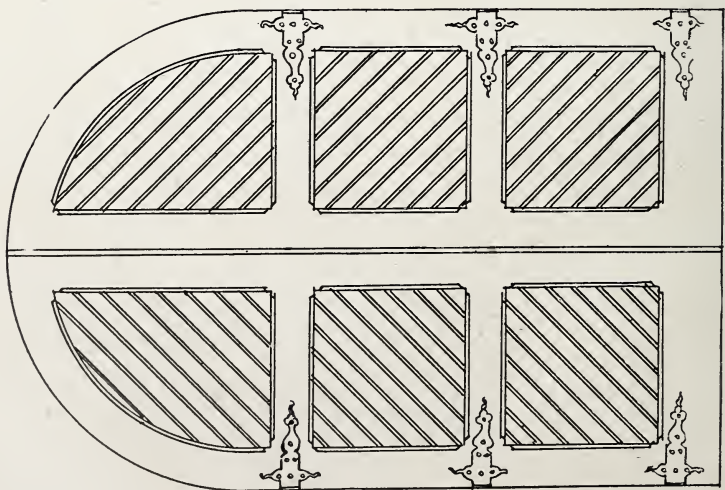

We make Church Doors of the most modern designs, and show herewith a few designs that harmonize in architecture with some of the Church Windows shown in first part of this Catalogue.

We also furnish Inside Vestibule Doors, covered with oil cloth or baize cloth, which is held tightly over wooden frames, and tacked on with brass tacks. These Doors are usually hung with double-acting spring hinges, which we show in the last part of our Catalogue, under Hardware. Send us list of requirements in this line for special prices.

Church Doors.

163

162

We make Church Doors of the most modern designs, and show herewith a few designs that harmonize in architecture with some of the Church Windows shown in first part of this Catalogue.

We also furnish Inside Vestibule Doors, covered with oil cloth or balze cloth, which is held tightly over wooden frames, and tacked on with brass tacks. These Doors are usually hung with double-acting spring hinges, which we show in the last part of our Catalogue, under Hardware. Send us list of requirements in this line for special prices.

veneered doors.

We show on the following pages designs of modern style Inside and Outside Doors, which, if made by the veneered process, are constructed as shown in Nos. 604 to 608, on page 106, this book. These Doors can, however, also be made in the solid, in which case we would make them similar to sections Nos. 600 to 603, as shown on page 106, this book. The ornamentations planted on these Doors do naturally not show on the sections as they do on the elevations on the following pages.

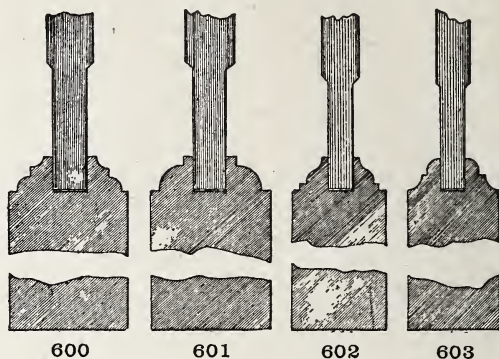

In ordering these Doors please state whether they are finished alike on both sides or whether they are finished on inside different from outside. If the inside finish of the Doors is left to us we make the inside finish of the Doors to harmonize with the other inside Doors used in the building.

We can make these Doors in solid White Pine or solid Cypress — in fact, in any wood. Further, Veneered White and Red Oak, either plain or quarter sawed, Veneered Ash, Birch, Cherry, Mahogany, etc. — in fact, in any of the native or foreign woods. If these Doors are veneered, we recommend the filling of the Doors, for which we make a small charge. After these Doors are filled they are not apt to suffer on account of weather influences and will prevent the dust from settling in the pores.

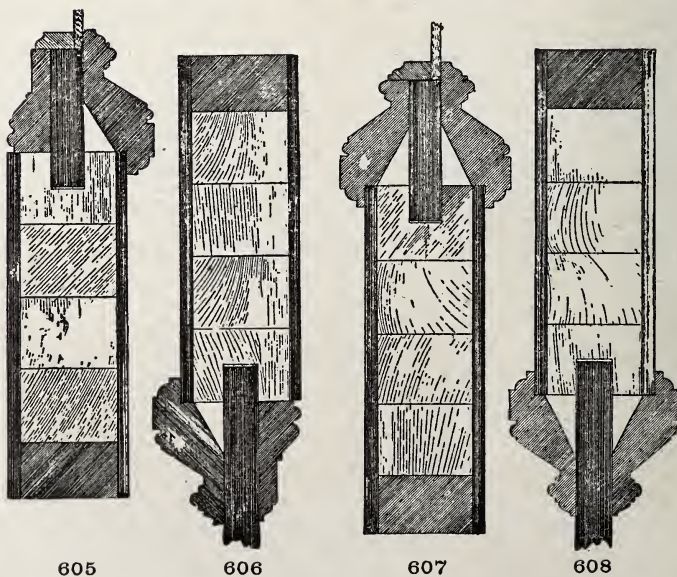

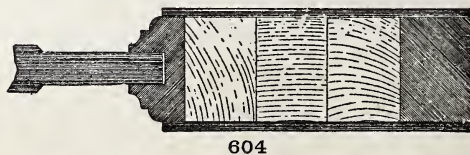

For colors of woods, after these Doors are finished, we refer you to pages 133 to 136, this catalogue, and since we use special care in selecting hardwoods as to color and grain, we can furnish you a strictly high-grade article.

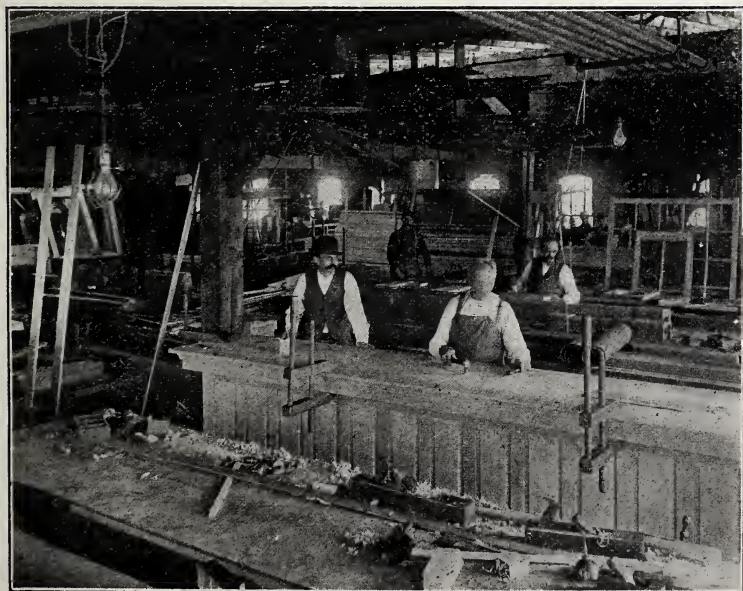

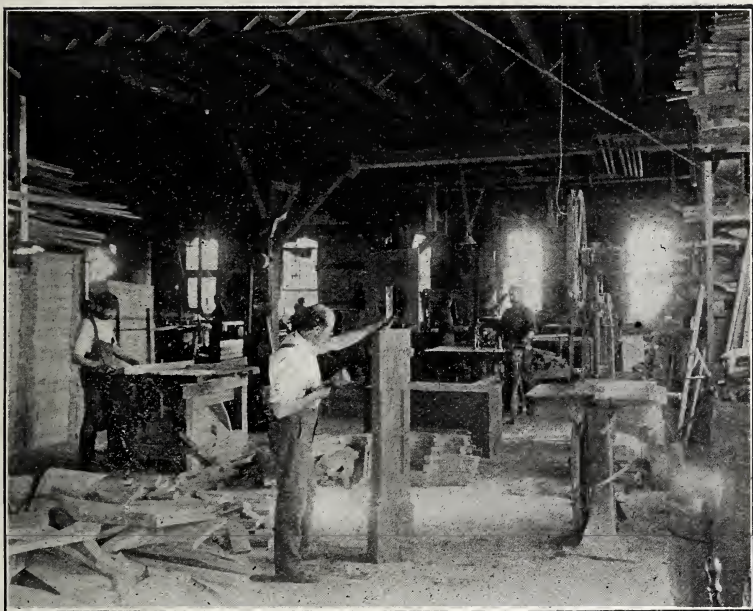

Our facilities for turning out these elaborate Doors are not excelled by anybody in this country, and we solicit your inquiries and orders.

COLORS OF WOOD.

For the purpose of showing the various colors of wood that we make reference to in this Catalogue, we have produced on the following pages actual samples of wood for the purpose of aiding any purchaser in determining what wood he desires to use for oil-finished work.

It is a well known fact that wood will vary slightly in color or grain as to the size of the tree from which the lumber has been manufactured, as to the location where a tree has grown, and various other circumstances, but we believe that you will get a fair idea as to how certain kinds of woods will look after they are finished in their natural colors by referring to the following pages.

The samples that we have reproduced have been somewhat reduced in the cuts, so that the grain in the actual samples is somewhat larger than the cuts show.

Oak can be filled Antique, Flemish, etc. White Pine or Cypress can be stained to look similar to Cherry. Birch can be stained so as to resemble Mahogany.

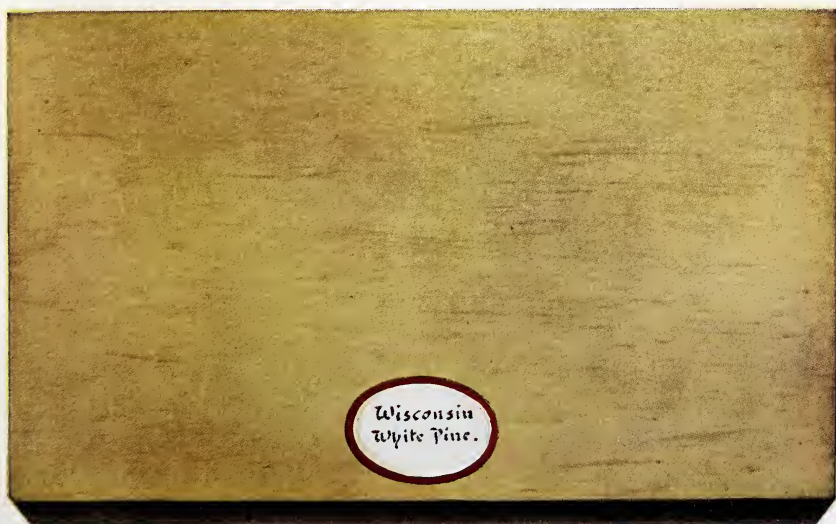

As we select all hardwood as to grain and color, we can furnish you **high class** hardwood work in all respects.

We recommend the filling of hardwood work before it leaves the factory, for which we make a small charge; thereby the work is not liable to get dirt into its pores while being shipped and handled. When you desire hardwood work filled, state whether the wood is to be filled in its natural color, or whether a colored filler is to be used.

Tabasco
Mahogany

Wisconsin
White Pine.

SOLID DOORS FOR HARD OIL FINISH

The tendency nowadays is very much toward Oil Finish work, and therefore a demand for goods has sprung up which can be produced at as low prices as White Pine. To meet this demand we are manufacturing largely,

- AA. Solid White Pine Doors.
- E. Solid Cypress Doors.

Also Doors in the following combination of woods:

- F. Doors with White Pine Stiles and Rails, Plain Yellow Pine Panels.
- G. Doors with White Pine Stiles and Rails, Cypress Panels.
- H. Doors with White Pine Stiles and Rails, Curly Yellow Pine Panels.
- K. Doors with Cypress Stiles and Rails, Plain Yellow Pine Panels.
- L. Doors with Cypress Stiles and Rails, Curly Yellow Pine Panels.
- N. Doors with Cypress Stiles and Rails, White Pine Panels.

We show on the following pages some half-tone cuts, giving you an approximate idea of how some of these Doors will look as to grain, and beg to say that any kind of finish will look well with these Doors, but we would usually advise a finish of the the same kind of wood as the stiles and rails of the Doors are made of.

In manufacturing these Doors, special care should be taken in utilizing thoroughly seasoned lumber for them, and as we kiln dry all the stock before it enters our factory, we feel safe in saying that we can serve you to your entire satisfaction on any goods that you may require. We finish these Doors usually Bead and Cove Sticking.

The List Prices we give are subject to Door A Discount for which see Price Guide, and any orders entrusted to us will be turned out promptly.

For colors of the woods used in these Doors, see pages 133 to 136.

Part Views of Bracket and Turning Department.

Here is where we make our IXL Gable Ornaments, Brackets, etc. Total number of our employes about 500.

BLINDS AND SHUTTERS.

Directions for Orders or Inquiries.

We show on the following pages Blinds and Shutters, for the manufacture of which we are especially equipped.

OUTSIDE BLINDS.

Orders for Outside Blinds Nos. 1060, 1061, 1062 and 1063 should state size of glass and number of lights in window for which they are intended; further, give thickness of Blinds. If for segment head windows, give radius of segment. We make all of our $1\frac{1}{8}$ -inch Blinds with O G sticking, and $1\frac{3}{8}$ -inch Blinds with square sticking, unless otherwise ordered.

INSIDE BLINDS.

Orders for Inside Blinds should give exact outside measurement of Blinds wanted. A great many customers are in the habit of just giving the glass size and number of lights in window for which they are intended, but as the sizes of Inside Blinds depend on the construction of the frame, we prefer to know the exact outside measurement the Inside Blinds are to be.

Give number of Folds. State if Blinds are to be like Nos. 1050, 1051, 1052 or 1053.

If Blinds are to have a different arrangement of panels or slats, or are to have stationary slats in part of the opening, give sketch, showing arrangement of panels, rolling slats or stationary slats.

Give thickness of Blinds. We make Blinds $1\frac{1}{8}$ -inch thick, unless otherwise ordered.

If Blinds fold in pocket, give size of pocket.

State if Blinds are to be finished for Oil.

In inquiring for prices on Inside Blinds it is very essential to know the quantity wanted, for on large quantities we make special inducements in prices.

If Blinds are wanted in hardwood, such as Oak, Cherry, Cypress or Yellow Pine, order must so state.

SHUTTERS.

We make shutters to order only. Inquiries or order should state outside measurement, thickness and number of style wanted.

LOUVRE BLINDS.

Give size and thickness of wall into which they are to go, also number of cut.

SLAT AND CLOSET DOORS.

Give size and thickness wanted, also number of cut.

SALOON DOOR BLINDS.

Give size and thickness wanted, also number of cut,

Outside Blinds.

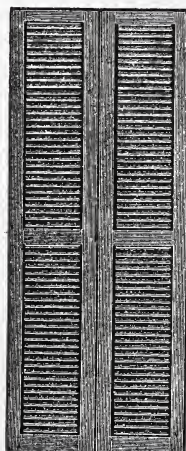

1062
Half Stationary and Half Rolling Slats.

1060
Rolling Slats.

1063
Rolling Slats.

1061
Stationary Slats.

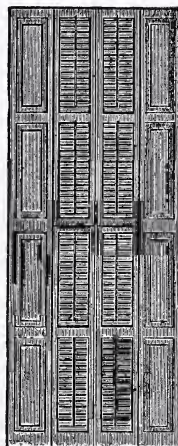

See directions for orders or inquiries on page 149, this Catalogue.

PATENT INSIDE SLIDING BLINDS.

We show on the following pages different styles of **Patent Inside Sliding Blinds**. We are in a position to furnish these Blinds promptly, and claim the following advantages for them :

They require no hinges. All trimmings furnished with the blinds.

They do not interfere with the curtains or window ornaments.

Light can be admitted from any part of the window.

They do not rattle or get out of order.

They are easily and rapidly operated, and quickly removed to clean.

It is not necessary to have window frames made especially for these Blinds, as they can be attached to any window.

While it costs on an average of \$1.00 to \$1.50 per window to hang the old-fashioned folding blinds, besides costing \$1.00 to \$2.00 for hardware, these Blinds can be put into place by any mechanic for 25 cents, or less, per window, and cost nothing for hardware.

When Ordering

Give the exact measurement of opening to be fitted with Blinds. If guideways are to take the place of stops, state distance from lower sash to face of casing; also state whether the window on inside is square, segment or circle top.

It is always a help to send a diagram of the casing, jamb, sash, etc., showing space for slides and points of measurement. **Exact Measurements are Very Important.**

Directions for Handling Inside Sliding Blinds.

If the Blinds are to stand in the boxes any length of time

see that they are in a **DRY place**. To store unfinished blinds in a newly plastered building will ruin them. Finished blinds are better somewhere else.

Stand the box with the addressed side perpendicular to the floor. The blinds will then stand on edge.

When Unpacking Blinds

stand them on one edge so that top and bottom of section will not get dirty and marred.

If the rolling slats do not move freely (they are all in perfect order when shipped) run the blade of a knife between the metal operator and the blind stile, then **when you try the slats** do not take hold of one and give it a wrench, you are liable to break it. Start each slat separately with a light pressure, they will work freely when once loosened.

Fitting Blinds to Windows.

When ready to put blinds in position see that all varnish is taken off the edge of each section with jointer. Put deep groove on most convenient side, shallow groove opposite, with screws. Screws are recommended as better than nails, as they are easier to remove and hold better. **See that screw heads are exactly level with surface of wood.** To fit blinds to window after slides are in, place section in deep groove; then if there is one-eighth of an inch between section and shallow groove slide, the section will go in when springs are on; these must be put on about one-fourth inch from top and bottom of each section. If blinds slide hard rub tallow or beeswax on edge of section and in groove till they work perfectly. If too easy, put on another spring or double the spring by nailing two on the same place. Ordinary sections require two springs; very small ones, one.

Directions must be observed to insure most satisfactory results.

Don't kick if you receive unfinished blinds in a damaged condition. The work was clean, dry, smoothly sanded and every joint perfect when it left our hands. Damp weather in transportation or storage in a newly plastered or green timber building will raise the grain, swell the panels and soften the glue joints. **Remedy:** Order blinds finished at the factory; you will get a better job, avoid trouble, and quality for quality, get it cheaper.

Add for each Finger Plate, 5 cents each.

Add for Circle or Segment Top, \$2.00 each.

Add for Convex or Swelled Blinds, \$4.00 each.

Prices subject to discount, see Price Guide.

Patent Inside Sliding Blinds.

Class "A."

Cut showing Sliding Blinds in three sections and four divisions, opened one-half of the window, and can be adjusted to expose any portion of the window desired.

This class of Blinds, when made of ordinary height—seven feet or less—is made in two, three or four sections in height, and two, three, four, or more divisions in width.

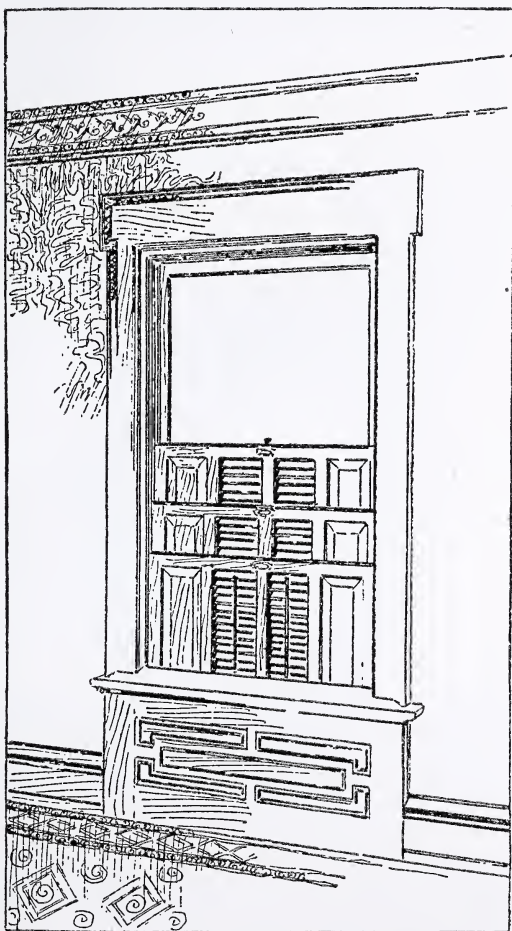

This Blind is made with the lower section all rolling slats, or with panels in the outside divisions, as shown in above cut; the other sections may be made with panels in the outside divisions, stationary slats in the center divisions, or may be all stationary slats or panels. A style that has pleased a great many of our customers is that having rolling slats only in the lower section and stationary slats in the two upper sections.

These Blinds are trimmed with bronze lifts, and include all necessary springs and guideways.

The guideways will be finished and Blinds shipped either in white or finished.

For List Prices, see page 161.

Patent Inside Sliding Blinds.

Class "B."

Cut showing Blind, with pocket at bottom of window, into which the Blind may drop out of sight.

This class of Blind is designed to go into pocket when not in use; they are made substantially the same as Class "A," but require longer guideways.

The pocket at bottom of window must be especially constructed.

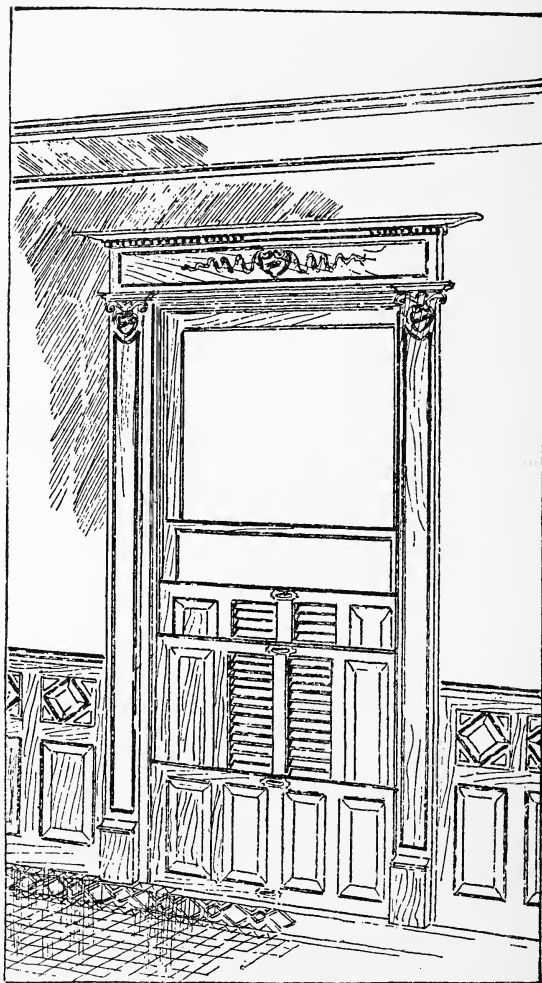

This window can be constructed so as to receive Blinds into pockets at the top, or bottom, or both, as in Class "D."

This Blind can be fitted with pulls, rolling slats, and device for operating, same as Class "D," at small additional cost.

The guideways will be finished, and no Blinds will be furnished in the white when steel strip is used.

For List Prices, see page 161..

Patent Inside Sliding Blinds.

Class "C."

Cut showing Blind running to floor. No pocket.

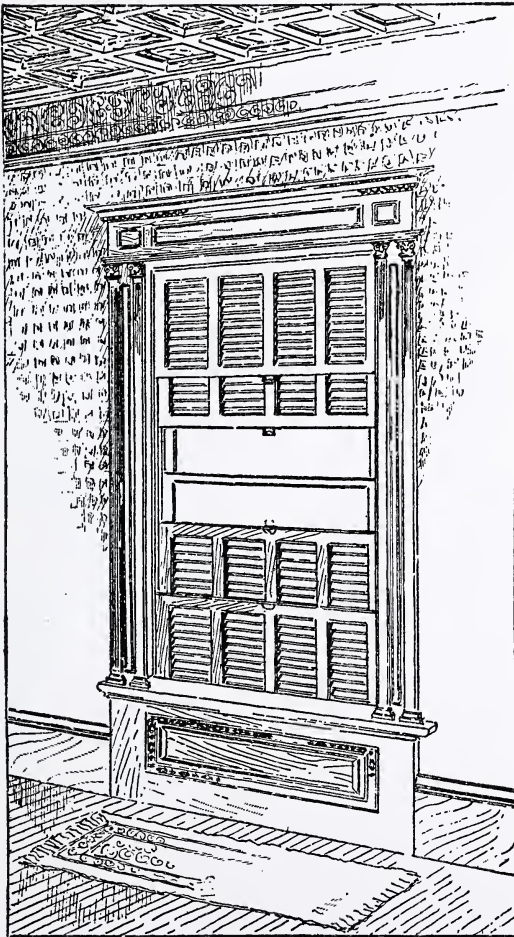

This Blind is substantially the same as Class "B," except the front or lower section is made all panels, which gives it the appearance, when the Blinds are lowered to the floor, as being a part of the finish of the room.

This Blind can be fitted with pulls and steel strip, same as Class "D," at a small additional cost.

The guideways will be finished, and no Blinds will be furnished in the white when steel strip is used.

For List Prices, see page 161.

Patent Inside Sliding Blinds.

Class "D."

Cut Showing Blind, with top and bottom pockets, four sections in height, guideways with two grooves.

This class consists of four sections of Blinds to the window, arranged in such manner that two sections go into pockets at top and two at bottom of window. The window must be especially prepared for the purpose and provided with pockets.

The guideways have two grooves each, and of sufficient length to extend into pockets. Two sections of Blinds run in each groove. The entire window is uncovered when they are run into their respective pockets.

This class of Blinds is trimmed with a drop pull and flat plate, as shown in cut.

For List Prices, see page 161.

VENETIAN BLINDS.

We take pleasure in showing to you on the following pages the most modern Venetian Blinds, which are well-known throughout Europe, and which have been in use for centuries and still remain great favorites. The Venetian Blinds that we furnish have been improved in a great many respects, so that we feel safe in saying that by placing your order with us, you will receive something that will suit you.

We claim for these Blinds to be the most modern window covering, to excel on account of durability, economy and compactness. They are also easily hung and removed, and as only the best of material is allowed to enter into their construction, we feel safe in saying that we can fill your wants in this direction to your entire satisfaction.

On pages 167 to 172, you will find the various positions in which these Blinds may be placed when they are hung, by which you will see that light and ventilation may be admitted from any part of the window.

We furnish them in Basswood, Yellow Pine, White Pine (finished natural, stained or painted), Ash, Plain Oak, Maple, Birch, Hazel, Butternut, Cypress, Quarter-sawed Oak, Sycamore, Red Birch, Cherry or Mahogany. The regular finish consists of one coat of Filler and one coat of best Coach Varnish. The "Special Finish" has one coat extra rubbing Varnish, hand rubbed, furnished in addition.

The tape and cords are made in the following colors: Drab, Buff, Buff and Brown striped, Cinnamon, White, Drab and White striped and Green. We are also prepared to furnish silk and worsted facing in Oriental designs for those desiring extreme elegance. Unless otherwise specified we select colors of tape and cord to match wood and finish.

All hardware is made out of highly polished Brass, and all Blinds come finished ready to be hung, including necessary hardware.

LIST PRICES FOR 2-INCH SLAT BLINDS.

PRICES ARE PER SQUARE FOOT.

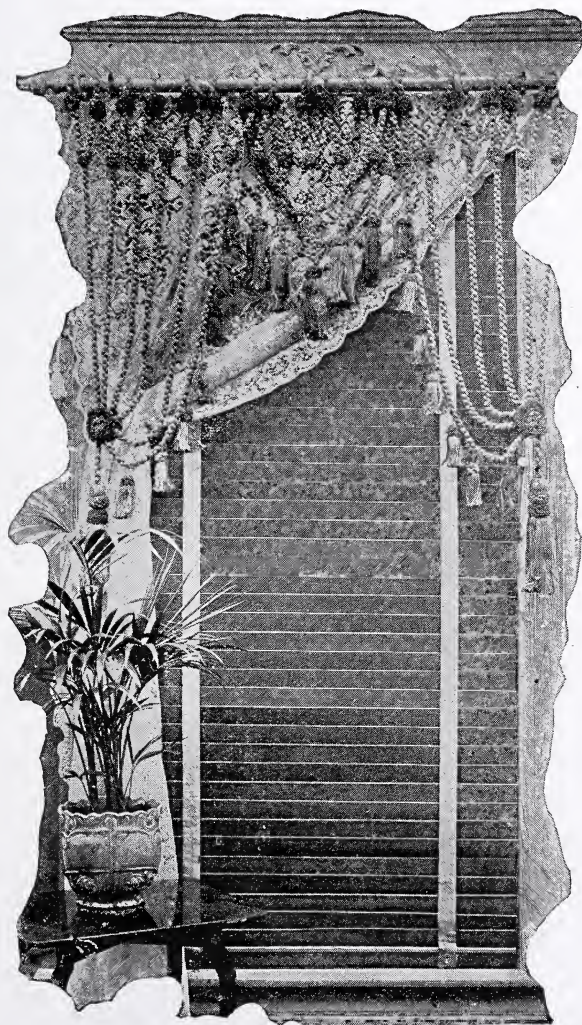

(No Blind computed at less than 15 Square Feet)

Spruce, White wood, Basswood, Yellow and Norway Pine, finished natural, stained to imitate hardwoods, or painted in dark colors,	\$0 21
Painted in light colors or tints.....	23
Painted in enamels	26
Enameled, rubbed between coats	40

Venetian Blinds.

This cut shows the Blind partly raised.

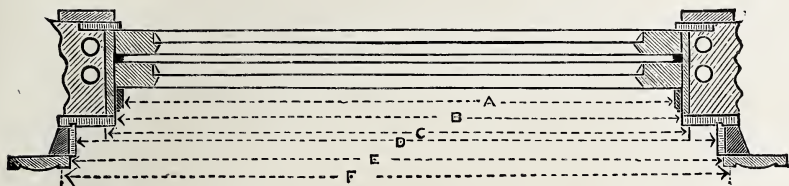

For List Prices, see page 166.

Venetian Blinds.

This cut shows the Blind raised on one side only.

For List Prices, see page 166.

Venetian Blinds.

Directions for Measuring.

Blinds should lap over $\frac{3}{4}$ -inch at C and F (on sides only). Measure width and height at A, B, C, D, E or F (width always first, and reduce all measurement to inches.)

A is generally the best point, although D and E are quite popular.

Directions for Orders or Inquiries.

Give number of Blinds wanted; also give kind of wood and finish you want, and state the width and height of the openings to be filled.

These Blinds are packed in boxes, and an average sized Blind weighs fifteen pounds.

Directions for Hanging.

Place Blinds at head of window and mark with pencil for brackets. Place brackets in position, and see that they are on line, and screw them fast. Untie cords, and let slats fall to floor. Grasp the top part and hang the Blind. Nail the Blind fastener, which is furnished for the purpose of preventing the Blind from being moved by the wind, directly under the cords of window stool. Nail the cord holder on casing.

The whole hanging of these Blinds does not cost much more than the hanging of ordinary shades, and anybody handy with a hammer and screw driver can hang them.

FRAMES.

Directions for Orders or Inquiries.

We show on the following pages Frames for both brick and wood buildings. We have special facilities for furnishing the common Frames, as well as complicated Frames, such as are required for slip head windows, oriel windows, etc.

Orders or inquiries for Window Frames should give:

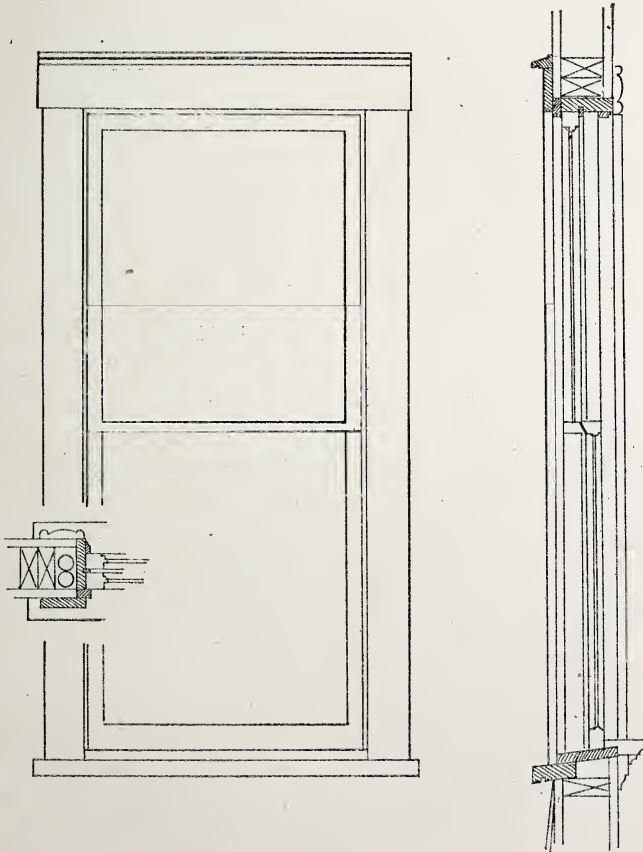

- 1st. Size of glass and number of lights in sash, if regular, and size of opening of sash or window if odd size.
- 2d. Thickness of sash or window.
- 3d. State whether single sash, check or plain rail windows.
- 4th. If segment, circle, gothic or elliptic head, state whether to show so in and outside or only outside and square inside.
- 5th. State whether with or without pulleys.
- 6th. State if for brick or for wood building.
 - a If for wood building, state width of jamb, style of outside finish (referring to cut number shown in this or other catalogues), whether put up or K. D., thickness of jambs. If outside Blinds are to be used, state so, and also give thickness of same.
 - b If for brick building, state thickness of wall, style of frame (taking number given in this or other catalogues). If outside Blinds or inside Blinds are to be used, state so; also give thickness of same.

Orders or inquiries for Door Frames should state:

- 1st. Whether for inside or outside.
- 2d. Size and thickness of door, and size and thickness of transoms, for which the frame is wanted.
- 3d. Whether for brick or wood building.
 - a If for outside wood building, state width of jamb, if Pine or Oak sill is wanted, style of outside casing (referring to cut number shown in this or other catalogues).
 - b If for brick building, state width of jamb and wall, thickness and kind of sill. If paneled, send sketch showing arrangement of panels. If paneled jamb is to be suitable for doors that we are furnishing, we will arrange panel work to suit.

NOTE.—For frame house Frames (outside wall), if not otherwise specified, we will furnish $\frac{7}{8} \times 4\frac{1}{2}$ in. plain outside casing. Brick house frames will have beaded hanging stile and plain arch bar, unless otherwise specified.

SHOWING THE APPLICATION OF A COLUMN TO A PORCH

We show above the application of a Classic Column to a Porch in detail.

In furnishing Staff Capitals, we always let the core of the Column project about one-eighth or one-quarter of an inch above the Capital, so that the entablature is carried by the Column proper and does not rest on the Capital.

Where Columns go against corners or against walls, we are prepared to furnish square Columns with Capitals to match round Columns.

In this connection we wish to say that we guarantee our Staff-work for exterior use to stand any weather influences and climate. We are also prepared to furnish composition work for inside use, which can be matched or grained in conformity with any wood.

You will find a large variety of Capitals and Brackets on the following two pages, all of which we are in a position to furnish promptly and at List Prices, which are subject to a liberal discount.

In ordering, give number, for which you will find size of neck, core and height and List Prices specified on page 214.

Porch Designs.

We show on the following pages a vast variety of Porch Designs from the cheapest to the most elaborate. You will find in these designs a great many absolutely original suggestions, and such as can not be found in any other catalogue.

For ordinary Porch work we would recommend especially I X L Porch suggestions shown on pages 240, 241 and 242, which are constituted of work that we carry continually in stock.

I X L Porch Suggestion No. 2349.

For this Porch suggestion you will find the columns No. 1721, on page 207 quoted in our regular Price Guide that we issue from time to time.

The bottom balustrade consists of sawed I X L Balusters No. 52, page 231, with I X L Rail Nos. 32 and 33, on page 220.

The top spindle work consists of top Spindle Rail No. 45, with bottom Spindle Rail No. 47, on page 221, and I X L Bracket No. 2, on page 225. The Spindles show a handsome arrangement of movable ball Spindles No. 14, on page 222.

The top railing shows I X L Rail Nos. 41 and 42, on page 219, also I X L Newell No. 21, on page 216, and I X L turned Balusters No. 35, on page 217.

I X L Porch Suggestion No. 2350.

For this Porch suggestion you will find the columns Nos. 1720, on page 207 quoted in our regular Price Guide, which we issue from time to time.

The bottom balustrade consists of I X L Hand Rail No. 41, I X L Foot Rail No. 42, on page 219, and Balusters No. 35, and the Brackets are like I X L No. 1, on page 225; you further require Gable Ornament No. 20, on page 264.

I X L Porch Suggestion No. 2351.

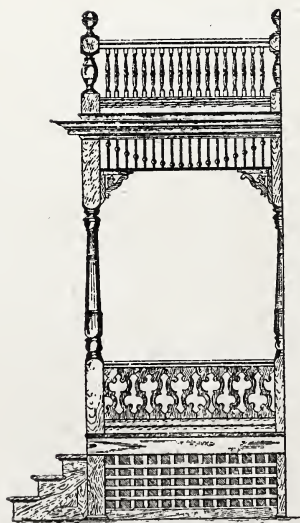

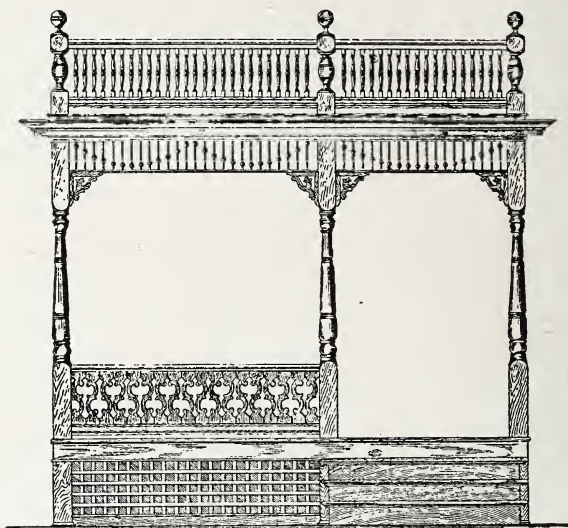

For this Porch suggestion you require Porch Columns No. 1721, on page 207, which we quote in our Price Guide.

For the bottom rail you find on left-hand side Sectional Balustrade D4, which we put up complete in sections; on the right-hand side you find I X L Sawed Balusters No. 18, on page 231, which requires I X L Hand Rail No. 32, and I X L Foot Rail No. 33, on page 220.

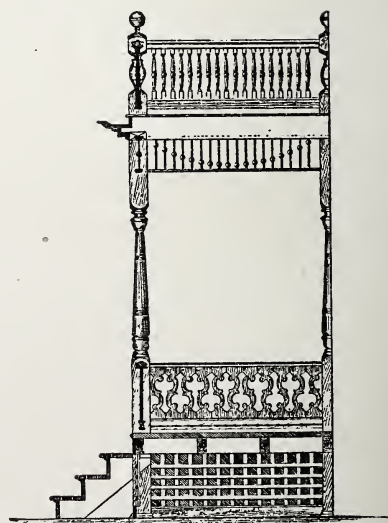

The top spindle work consists of I X L Top Rail No. 45, and I X L Bottom Spindle Rail No. 47, on page 221; further, turned Spindles No. 51, on page 222, and I X L Bracket No. 2, on page 225.

The Gable shows I X L Gable Ornament No. 16, on page 265.

IX L Adjustable Gable Ornaments.

Nothing can be simpler than to put up an IX L Adjustable Gable Ornament as manufactured by us under Burton's Patent. We carry on hand the following styles:

No. 12, which extends 4 feet down rafter.

No. 20, which extends 5 feet down rafter.

No. 15, which extends 6 feet down rafter.

No. 16, which extends 6 feet down rafter.

For prices, see our Price Guide.

On the following pages we show how easily they can be placed in position. They are so well known that we need not go into the merits of same, but to those who have not handled them as yet we do not hesitate in saying that they will meet with ready sale.

As we are the only **licensed** manufacturers in this market under Burton's patent, we would request the trade to only handle Ornaments which do not infringe on the patent and of which each pair is stamped thus —

BURTON'S PATENT ADJUSTABLE GABLE,

Patented July 9th, 1895.

IXL Adjustable Gable Ornaments.

This cut shows Gable Ornament No. 20 in its K. D. shape as taken from the crate.

This cut shows same partly put together.

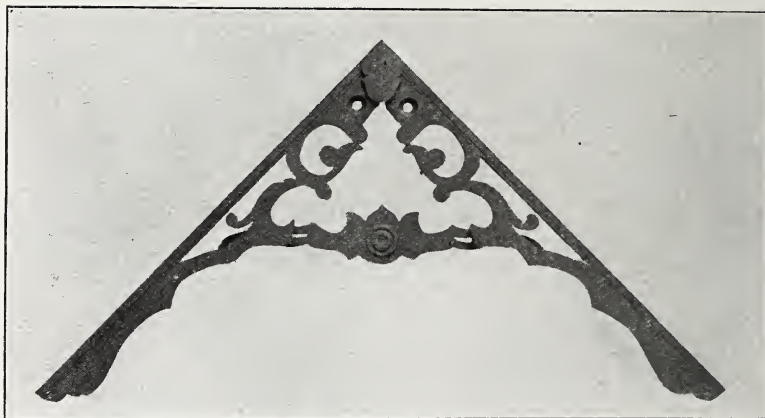

IXL Adjustable Gable Ornaments.

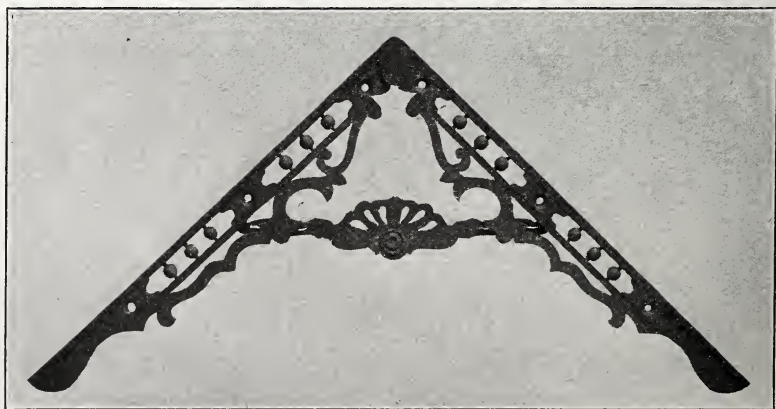

Above cuts show the Ornament ready to be placed in position.

IXL Adjustable Gable Ornaments.

12

Extends 4 feet down rafter.

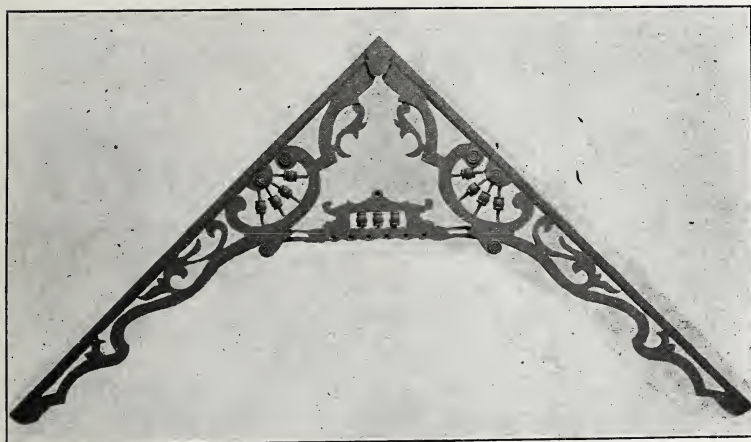

20

Extends 5 feet down rafter.

It costs usually more to get the measurement for a Gable Ornament than our IXL Gable Ornaments cost put up complete.

IXL Adjustable Gable Ornaments.

15

Extends 6 feet down rafter.

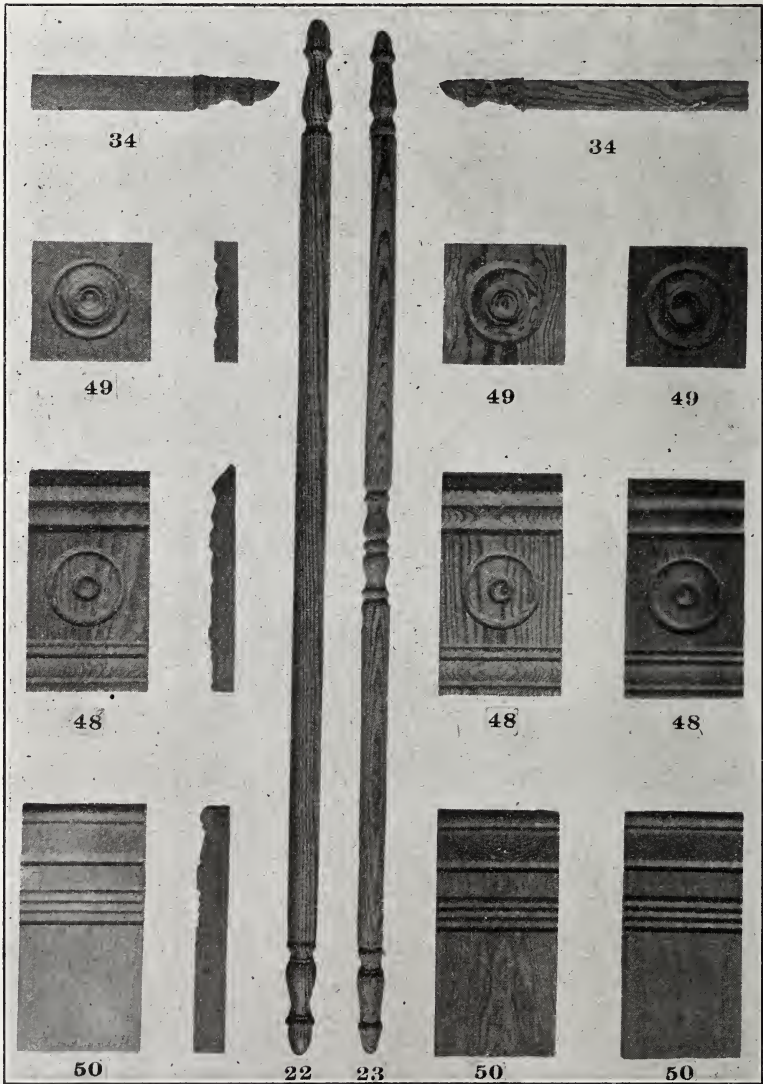

16

Extends 6 feet down rafter.

To get the pitch of the roof, fit an ordinary Ornament, etc., etc., is more expensive than the total cost of an IXL Gable Ornament.

Try a few of them.

STAIR WORK.

Directions for Orders and Inquiries.

We have superior facilities for turning out any kind of Stair Work at the lowest prices and with the utmost dispatch. We can furnish either Stairs complete, ready to set up, or Newels, Railings, Balusters, Steps, in fact, any part of work required for the construction of Stairs. We make Stairs in all kinds of wood, and refer you for the selection of such to pages 133 to 136.

Please observe the following directions, necessary for ordering Stairs:

- A. Give height of story from floor to floor.
- B. Give width of joist in second story.
- C. Give width of Stairs.
- D. Give run of Stairs.
- E. Give size of cylinder.
- F. Give style of Base used in Hall.
- G. Give number of ground plan of Stairs, as shown on the following page. If stairs run differently and not similarly to any ground plan shown, make sketch.

Be sure to specify distinctly what kind of wood the different parts are to be made of.

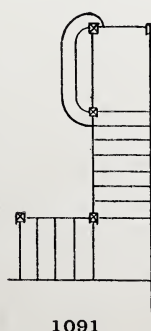

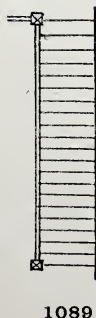

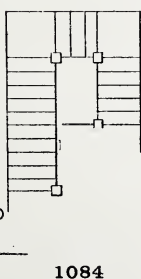

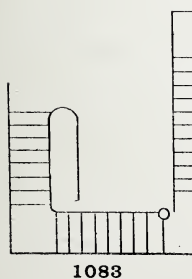

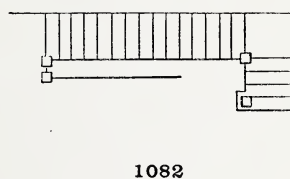

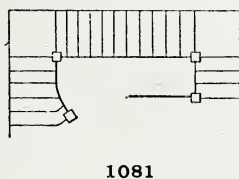

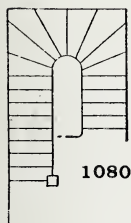

Orders for Stair Railing should state the following:

- A. Design, size of Shaft, or base of Newels.
- B. Design, size and length of Balusters.
- C. Design, size of Shaft and location of platform Newels.
- D. Design, size and number of feet of straight Rail.
- E. Show location of easing, platform crooks, cylinder crooks and quarter turns on plan, and give number of ground plan, or if Stairs run differently from any shown on following page, submit sketch.
- F. Give height of Riser and width of Tread, as cut out on string board.

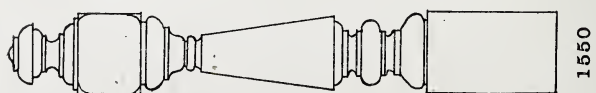

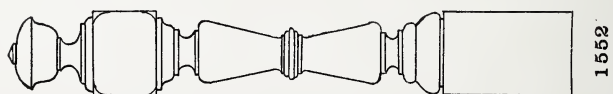

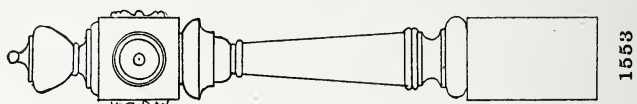

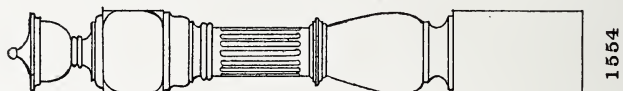

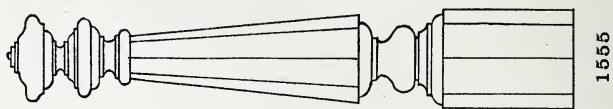

For circular or winding Stairs we should have an exact plan of Stairs as built, giving height of rise and width of step, the location of riser, cylinder, etc.

We show in this part of the book a good many new and modern designs for Stair work, such as are not shown in any other catalogue, however, if you desire estimates on special designs, or cuts shown in other catalogues, they will be priced upon application.

HARDWOOD MANTELS.

We show on the following pages a very fine line of Hardwood Mantels.

These Mantels are all cabinet make and must not be compared with the cheap article that is usually turned out by the furniture factories. We furnish these Mantels in all of the native and foreign hardwoods, but they are carried in stock only in Oak, as stated below each cut.

Below each Mantel you will find the price complete with any of the outfits as shown on pages 352 to 357. You will note that we do not include common brick, arch bars, cement and mortar which is necessary for setting Mantels, as these can usually be bought in your own town for less money than the freight amounts to. These Mantels are all finished ready to set up. All prices quoted are for stock sizes as given under each cut, F. O. B. cars here.

Fancy woods and finishes, such as genuine Mahogany, Cherry, Bird's Eye or Curly Maple, Curly Birch, White and Gold, etc., made to order at an additional cost, depending upon Mantel wanted. Special prices on same furnished on application.

Directions for Orders or Inquiries.

1. State number of Mantel, and specify which outfit is wanted with same.
2. If Mantel is to be made out of other than plain or quarter-sawed Oak, state so.
3. State width of chimney breast. All of our stock Mantels are made for five feet chimney breast, and can be widened to five feet three inches by extending the wall plates. Other dimensions as given under cuts.

FIRE BRICK.

Regarding Fire Brick. Outfits H, J, L and N do not include fire brick, as same can usually be bought in your town for less than the freight would amount to, but in cases where you cannot purchase fire-brick in your town, we will furnish same at \$1.60 per Mantel extra.

Outfits A, B, C and O are mounted grates, made in one piece like a stove, and have fire-clay linings, hence do not necessitate the use of any fire-brick.

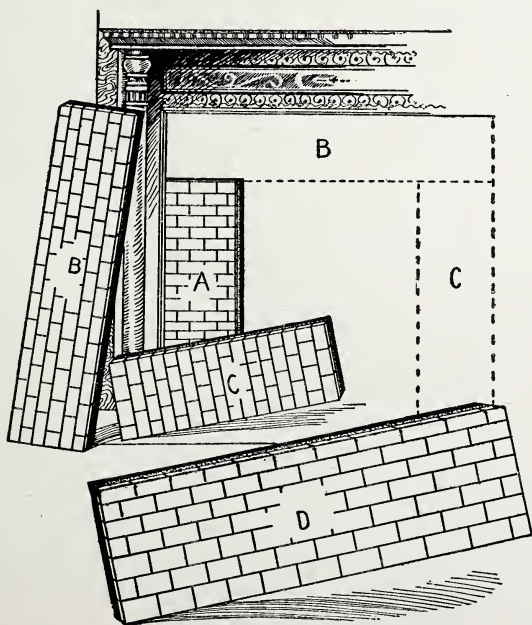

Mounting Tile in Slabs.

For out-of-town trade where the services of a skilled tile setter cannot be had, we are prepared to mount Tile Facings or Hearths in slabs all ready to set.

When furnished mounted in this manner, Tile Facings or Hearths can be set in position by anyone, and at the same time it makes an absolutely perfect and mechanical job.

Price for Mounting Tile Facings\$3 00 extra.

Price for Mounting Tile Hearths 4 00 extra.

The above illustration shows our tiling mounted in slabs, as we send it out when so ordered, all ready to place in position. "A" represents a section of Facing in position. "B" and "C" similar sections to occupy the blank spaces so marked. "D" represents the Tile Hearth.

We recommend very highly the use of Mounted Tile to those who are desirous of securing a good job.

Directions for Setting Wood Mantels, Tile and Fire-Places.

See that your chimney is well built and sound, and an arch is turned for the hearth. Put all the tile to soak in clean water. They may remain there an hour or more and then be laid out to drip. In the box with the tile may be found a diagram showing size, and how the hearth is to be laid out. Place the Mantel against the wall and mark out the hearth. Take careful measurements of the profile of Mantel, the tile opening, etc., also mark the chimney where the screws go through the Mantel to hold it in place, and remove the Mantel. Cut out the floor to the proper size and lay in the concrete or the foundation to within an inch of the floor level. The concrete may be made of gravel and common cement. (Some prefer to lay in common brick; if this is done the brick must be well soaked before laying the cement and tile on them.) Examine the diagram and lay out the hearth on the floor convenient enough to be picked up piece by piece and put in place. When the concrete has set, mix some Portland cement (one-third cement and two-thirds clean sharp sand) and place this on the concrete thick enough to raise the tile one-eighth inch above the floor. When you have the cement in smooth and level, lay the tile on it, commencing on the outside as per diagram. After the tile are all laid in and fitted nicely to place, wedge them all around to keep them from spreading and hammer them down lightly with a wood block or a smooth piece of board to the level of the floor. When you have got them all nicely in place, level and evenly spaced, mix a little of the Portland cement quite thin and wash it over the surface, working it into the joints where needed. After this has partially set wipe the tile perfectly clean with saw dust or shavings or whatever you have handy. All of the cement should be cleaned off, as it is very difficult to remove it after it has set. Drill and plug the chimney where the screws take hold to fasten the Mantel.

As an assistance to you in the above work, study well figure 1 on following page.

You already have the profile, etc., of the Mantel. Now study figure 2 and lay up the piers, then take the iron arch-bar, lay it across from pier to pier and build the arch on them, making it high enough to fill the opening and a trifle over. Now, the arch-bar is as high as the frame, and the piers far enough apart to allow the fire-brick to go in and the frame to fit all around. Set the grate into the fire-place to get the proper angle, and build the fire-place of the brick as shown, leaving about three-quarters of an inch play all around the grate. Use fire-clay to lay up the fire-brick with. Cut the fire-brick (See Fig. 1, a to c) on the sides so as to allow the back brick to rest against them, and draw in the sides to fit the damper. Fill in behind the inclining back with bats and mortar. All this being done leaving a space of seven-eighths of an inch from the face of the masonry to the profile of the Mantel in which to put the cement and tile for the facing, except where the edge of the fire-brick is caught by the frame. Set the metal frame in place, blocking it away from the face of the masonry where necessary, and anchor it to the masonry with the wires. Mix Portland cement for the facing, half and half with clean sharp sand, and set on the facing tile as shown in figures 1 and 2, breaking joints and setting the tile so that no opening will show between them and the frame or Mantel, using care to keep them plumb and the surface even, finishing the work same as in the hearth.

Drive some wood plugs into the chimney where the screws go through the Mantel, and when the masonry and tile work is perfectly dry, screw the Mantel to place, using the wood buttons to cover up the screw holes.

Tiles can be cut, if it is necessary, by scratching the enamel with a hard, sharp steel instrument, like a cold chisel or sharpened file, and then striking them on the back, opposite the scratch, with a light hammer. The edges can be ground smooth, if wished, on a fire-brick.

The profile is the projection of the tile lining of Mantel from face of chimney and represents the distance the face of tiling must be set from face of chimney.

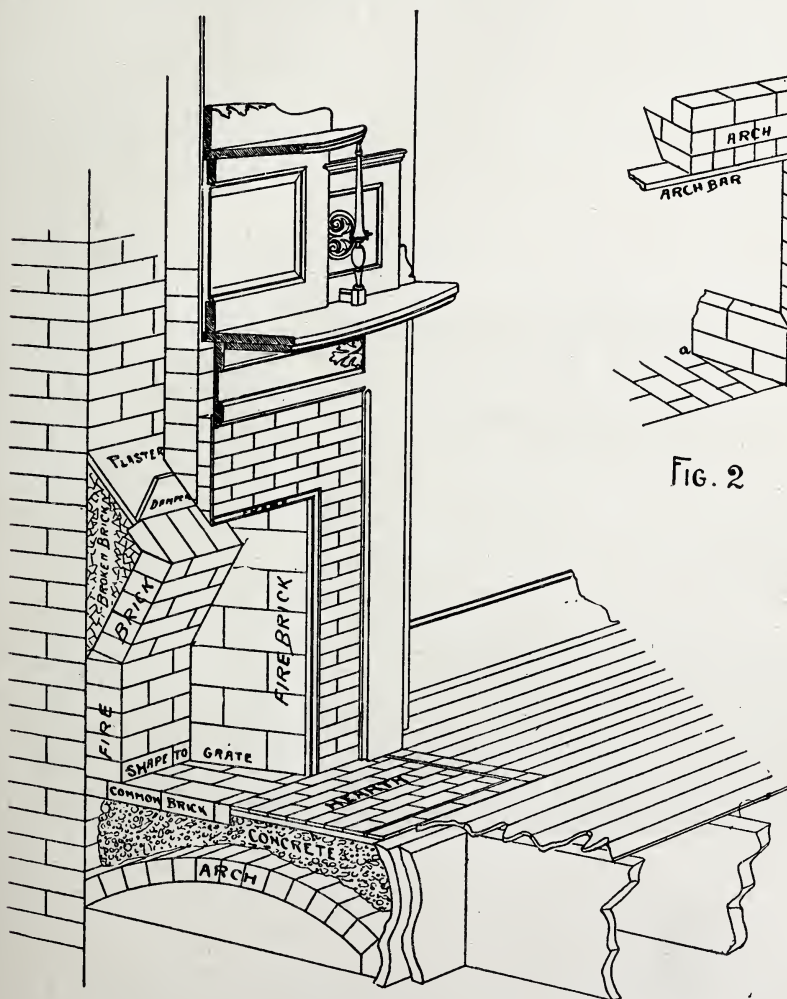

FIG. 1

See preceding page for printed instructions for setting Mantels, etc.

Outfits.

Regarding Outfits. The following Outfits can be furnished with Mantels mentioned in this book. In ordering please specify which Outfit is wanted.

OUTFIT "A" consists of

Fire-Place—No. 1116 Plated Monarch Grate, $30\frac{1}{2}$ in. wide, $30\frac{1}{4}$ in. high, with 24-in. basket and plated summer front.

Facing—Best quality plain enameled tile.

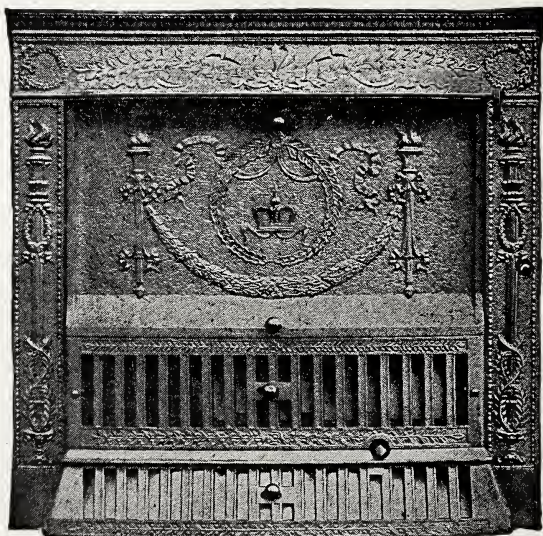

Hearth—60 x 21 in. Best quality plain enameled tile.

OUTFIT "B" consists of

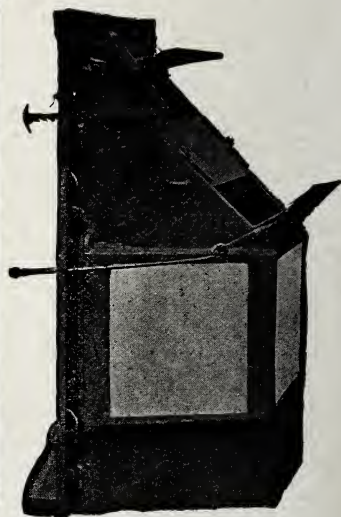

Fire-Place—No. 1116 Plated Monarch Grate, $24\frac{1}{2}$ in. wide, $30\frac{1}{4}$ in. high, with 20-in. basket and plated summer front.

Facing—Best quality plain enameled tile.

Hearth—60 x 21 in. Best quality plain enameled tile.

No. 1116 Monarch Grate.

Side view, showing Damper Arrangement.

$30\frac{1}{2}$ in. wide, $30\frac{1}{4}$ in. high, 24-in. basket.

$24\frac{1}{2}$ in. wide, $30\frac{1}{4}$ in. high, 20-in. basket.

We recommend Monarch Mounted Grates to those who desire the comforts of a furnace and the cheer of the open fire-place. They are made like a stove complete all in one piece, and do not require the services of a skilled mason to set them, as all that is necessary is to push them into the fire-place and they are ready for use. The fire-pot in the Monarch Grate is lined with heavy fire-clay lining that will not burn out, and also has latest improved shaking bottom. These Grates are supplied with double draft dampers which are operated from the front with knobs (see illustration). The damper is immediately over the fire and in opening same you heat the flue, forming a current that carries off the dense smoke. When the fire is under way you close the lower damper leaving the upper one open, and the heat is forcibly reflected into the room. We recommend the Monarch Grate for burning hard or soft coal, and as heaters they cannot be excelled.

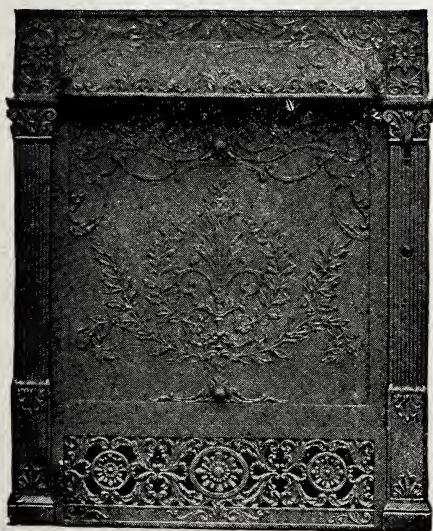

Outfits — Continued.

OUTFIT "C" consists of

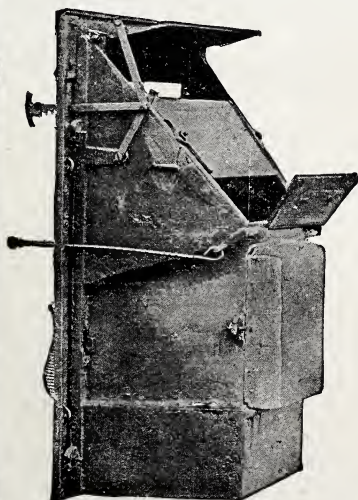

Fire-Place—No. 1035 Plated Buckeye Grate, $24\frac{1}{2}$ in. wide, $30\frac{1}{4}$ in high, with 20-in. basket and plated summer front.

Facing—Best quality plain enameled tile.

Hearth—60 x 21 in. Best quality plain enameled tile.

No. 1035 Buckeye Grate.

Side view, showing Damper Arrangement.

$24\frac{1}{2}$ in. wide, $30\frac{1}{4}$ in. high, 20-in. basket.

The Buckeye Grate which we show above is without doubt, one of the most beautiful Grates of its kind ever produced. It has all of the desirable features of the Monarch Grate, having the same damper arrangement, and also a shaking bottom. The fire-pot is lined in the back with fire-clay lining, while the sides are of very heavy iron.

These Grates being made all in one piece like the Monarch, they do not require any labor or expense in setting. While they are not quite as heavy as the Monarch Grate, still they always prove to be excellent heaters, are durable, and in all cases give perfect satisfaction.

Outfits — Continued.

OUTFIT “J” consists of

Fire-Place—No. 1338 Jewel Grate, with plated frame, $24\frac{1}{2}$ in. wide, $30\frac{1}{4}$ in. high, 20-in. Berlin black basket and ash screen and plated summer front.

Facing—Best quality plain enameled tile.

Hearth—60 x 21 in. Best quality plain enameled tile.

Extra charge of \$2.00 if Double draft damper is wanted with this Outfit, but same is never included unless so ordered.

No. 1338 Jewel Grate.

The Jewel Grate which we show above, is one of the most serviceable grates made. The basket is made of heavy iron and hangs on the frame, and the fire-brick should be built to fit snugly up to the basket. The basket is so made that it is very easy to take out the ashes. For burning soft coal or wood these grates cannot be excelled.

Outfits — Continued.

OUTFIT "L" consists of

Fire-Place—No. 326 plated frame, $30\frac{1}{2}$ in. wide, $30\frac{1}{4}$ in. high, 24-in. Berlin black Club House basket and ash screen and plated summer front.

Facing—Best quality plain enameled tile.

Hearth—60x21 in. Best quality plain enameled tile.

No. 326 Club House Grate.

$30\frac{1}{2}$ in. wide, $30\frac{1}{4}$ in. high, 24-in. basket.

To those who desire a good, large fire-place at moderate cost, we recommend the No. 326 Club House Grate, as shown above, as same has a 24-in. Club House basket, which when properly set in place and built up with fire-brick, cannot be surpassed as a heater. The above grate has the same style basket as shown in No. 68 Open Club House Grate, shown on page 356, only same is 24 in. wide instead of 20 in.

Outfits—Continued.

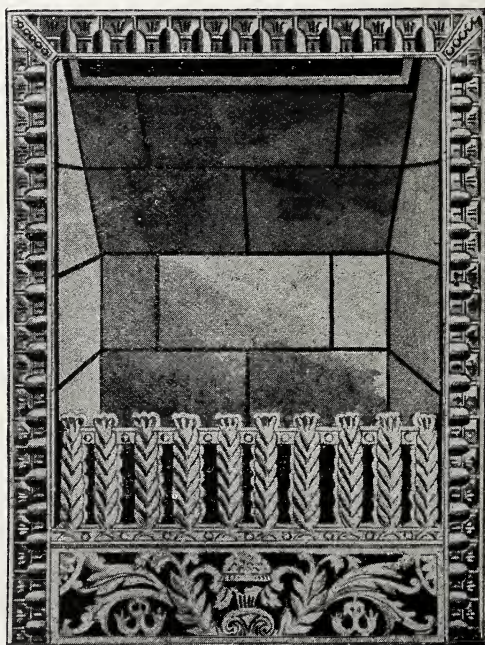

OUTFIT "N" consists of

Fire-Place—No. 68 Open Club House Grate, $24\frac{1}{2}$ in. wide, $30\frac{1}{4}$ in. high, with 20-in. basket and ash screen.

Facing—Best quality plain enameled tile.

Hearth—60x21 in. Best quality plain enameled tile.

Extra charge for plated summer front for above grate, \$4.50.

No. 68 Open Club House Grate.

$24\frac{1}{2}$ in. wide, $30\frac{1}{4}$ in. high, 20-in basket.

The Club House Grate is one of the best low priced grates on the market. The basket sets on four legs and the fire-brick are to be built up to fit the basket snugly. These grates always give satisfaction when properly built up, but to those who have no mason in their vicinity we recommend either Outfits, A, B, C or O, as these are made in one piece like a stove, and require no labor or expense in setting them, it being only necessary to push them into the fire-place and they are ready for use.

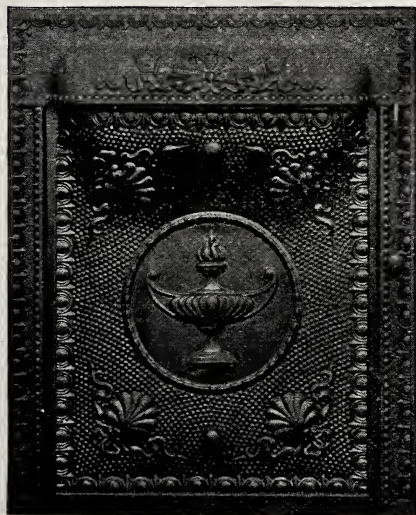

Outfits—Continued.

OUTFIT "O" consists of

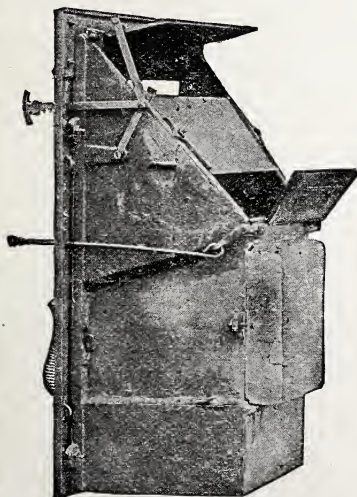

Fire-Place—No. 1045 Plated Buckeye Grate, $24\frac{1}{2}$ in. wide, $30\frac{1}{4}$ in. high, with 20 in. basket and with plated summer front.

Facing—Best quality plain enameled tile.

Hearth—60x21 in. Best quality plain enameled tile.

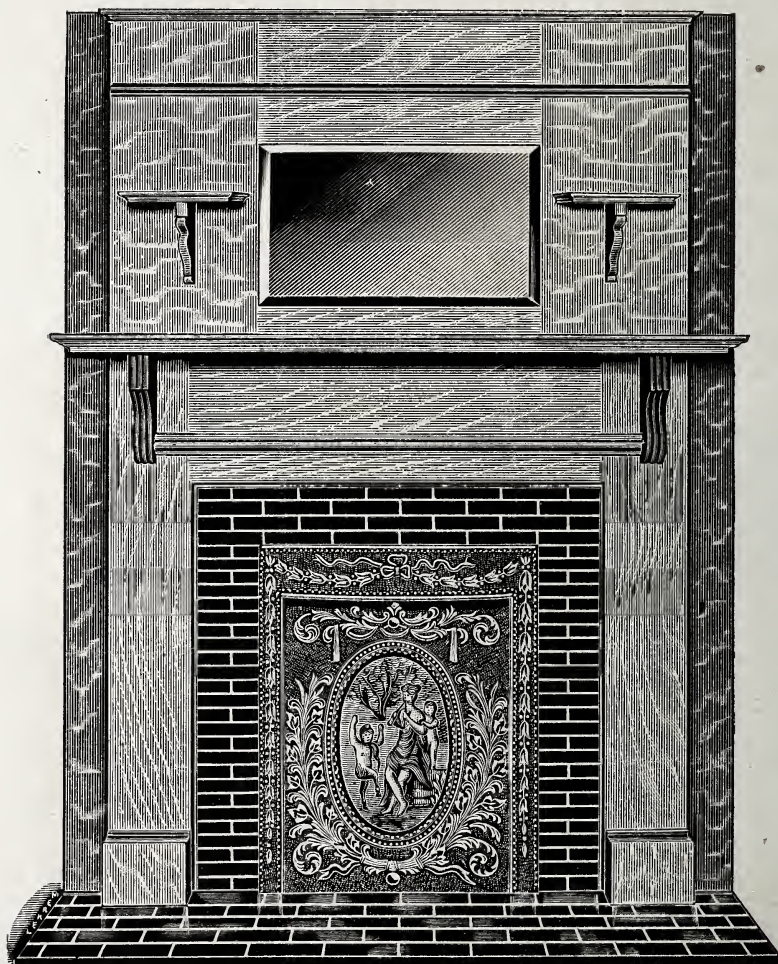

No. 1045 Buckeye Grate.

Side view, showing Damper Arrangements.

$24\frac{1}{2}$ in. wide, $30\frac{1}{4}$ in. high, 20-in. basket.

The above grate which we show is one of the most attractive mounted grates on the market to-day. It is made all in one piece like a stove and it is only necessary to push it into the fire-place and it is ready for use. The fire-pot in this grate is lined in the back with fire-tile while the sides are heavy iron. These grates are excellent heaters and have always given perfect satisfaction.

Floor Tiling.

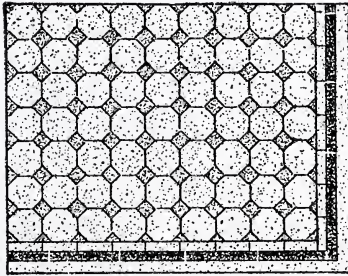

Fig. No. 1

The above illustration shows White Vitreous Floor Tile, 3×3 Octagons, with $1\frac{1}{16} \times 1\frac{1}{16}$ Light Blue Dots and with Border Strips of Blue and White, at 80 cents per square foot.

Or, we can furnish the above pattern, same sizes, in Eucaustic Floor Tile, Buff Octagons, with either Red or Blue Dots and suitable Border Strips, at 50 cents per square foot.

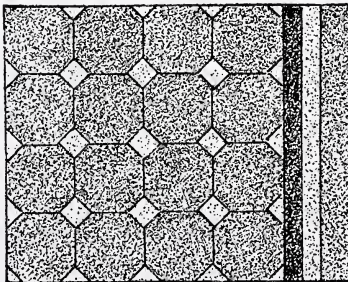

Fig. No. 2

The above illustration shows Eucaustic Floor Tile, $4\frac{1}{4} \times 4\frac{1}{4}$, Buff Octagons, with $1\frac{1}{2} \times 1\frac{1}{2}$ Red or Blue Dots, with Border Strips of suitable color, at 50 cents per square foot.

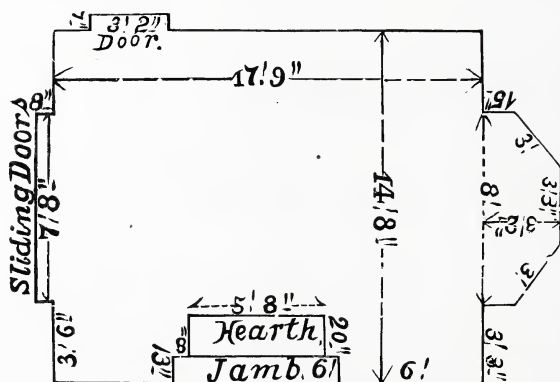

For discount, see Price Guide.

PARQUETRY.

We show, on the following pages, some designs for Parquetry Floors.

The impression prevails that Parquetry Floors are a very expensive luxury only to be afforded by the wealthy, and therefore its advantage of healthfulness, cleanliness and comfort are to be possessed by the comparative few. In view of this erroneous impression, we have put the price on these goods so low that even people in moderate circumstances can enjoy the advantage of Parquetry Floors at the cost of an ordinary carpet. Our goods can be laid over any floor where the ordinary carpets or oil cloth can be used, and are very much cheaper in the end, as the first cost is but little more, and they will last almost as long as a house.

Any carpenter or cabinet maker can lay these goods, as we furnish a plan for each floor, and printed instructions for the laying and finishing.

Directions for Measuring Rooms.

Draw a plan the shape of the room, showing all the doors, windows, recesses, length and projection of hearthstone, etc. (See cut). Give the full length of room — 17 ft. 9 in.; width, 14 ft. 8 in. (better measure the width of both ends of the room); length of hearth, 5 ft. 8 in.; projects from the wall line, 2 ft. 9 in.; also bay window as shown; distance from hearth to end wall, 6 ft.; sliding doors, 7 ft. 8 in. x 8 in. Measure windows and doors, say 3 ft. or 4 ft. long, and they deflect 6 in., or whatever they may, from the line of the baseboard.

The prices we give on the following pages are necessarily only approximate, therefore, if you are in the market for Parquetry we would suggest that you send us measurements of the room as given above, and give us the number of Plate that you desire to utilize and we will send you estimate on same promptly.

List Price of Finishing Material.

Interior Hard Wax Finish brings out the contrasting colors of the different woods. It will not scratch or deface easily, and any stains are readily removed. We quote same in self-sealing cans, 1, 2, 4 and 8 lbs. Per pound, 60c.

Paste Wood Filler, in cans, 2, 5 and 10 lbs. Per pound, 15c.

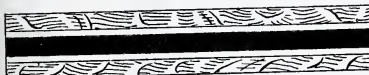

Parquet-lac; quart, 80c.; half-gallon, \$1.50; gallon, \$2.70.

Weighted Floor Brushes (25 lbs.), which are a necessity for the keeping of Polished Hardwood Floors in good condition, we quote at \$4.00.

For discount, see Price Guide.

Parquetry Borders and Strips.

5-16 in. thick; can be used in connection with wood carpet, parquetry fields or plain floor.

		Inches Wide.	Price.	Inches Wide.	Price.
1		1½	\$0 01½	2	\$0 01½
6		1½	1½	2	2
8		1½	2	2	3
15½		6	12	8	16
75		8	28	Corners Each. \$0 28	
71		8	24		28
96		10	28		35
100		10	28		28
93		10	30		35
105		12	40		52

Borders are made in lengths of 12 ft., and to any desirable widths.

For discount, see Price Guide.

Parquetry Floors.

Wood Carpet.

We show on this page, and on the following page, Parquetry Floors that have in the center wood carpet, which is also termed, "Roll Goods." This wood carpet consists of Strips $\frac{5}{16}$ of an inch thick, which are firmly cemented on strong Cotton Cloth backing, and because these goods are rolled up when being shipped, they are also called roll goods. Roll goods are usually put up in bundles of 5 yards.

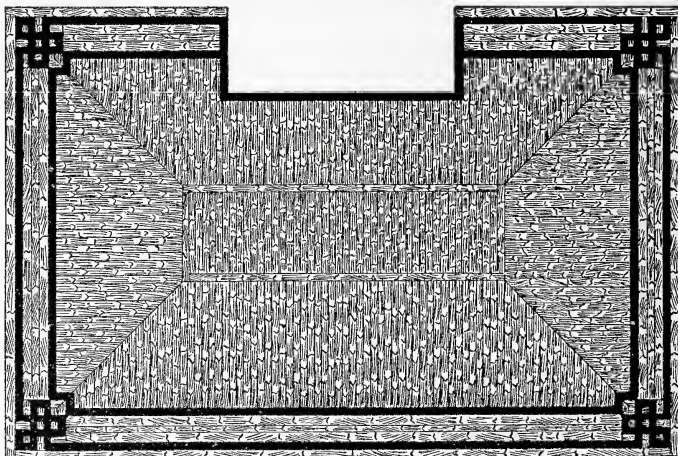

Plate No. 1

Plate No. 1 shows a strip border of Oak and Cherry. The center shows Quarter-Sawed Oak wood carpet.

Price per square foot.....22 cents.

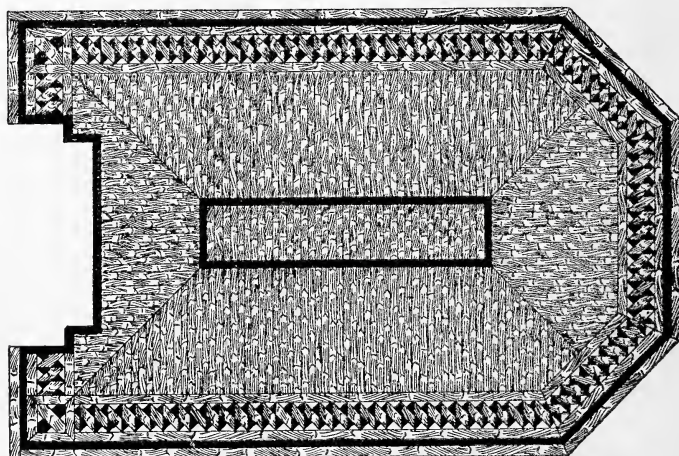

Plate No. 2

Plate No. 2 shows 2-in. Oak strip next to wall, and $1\frac{1}{2}$ -in. strip of Cherry following, then border No. 96, 10 in. wide, consisting of Oak, Maple and Mahogany, and the center shows Quartered Oak wood carpet.

Price per square foot.....25 cents.

For colors of wood, see pages 133 to 136.

For discount, see Price Guide.

Parquetry Floors.

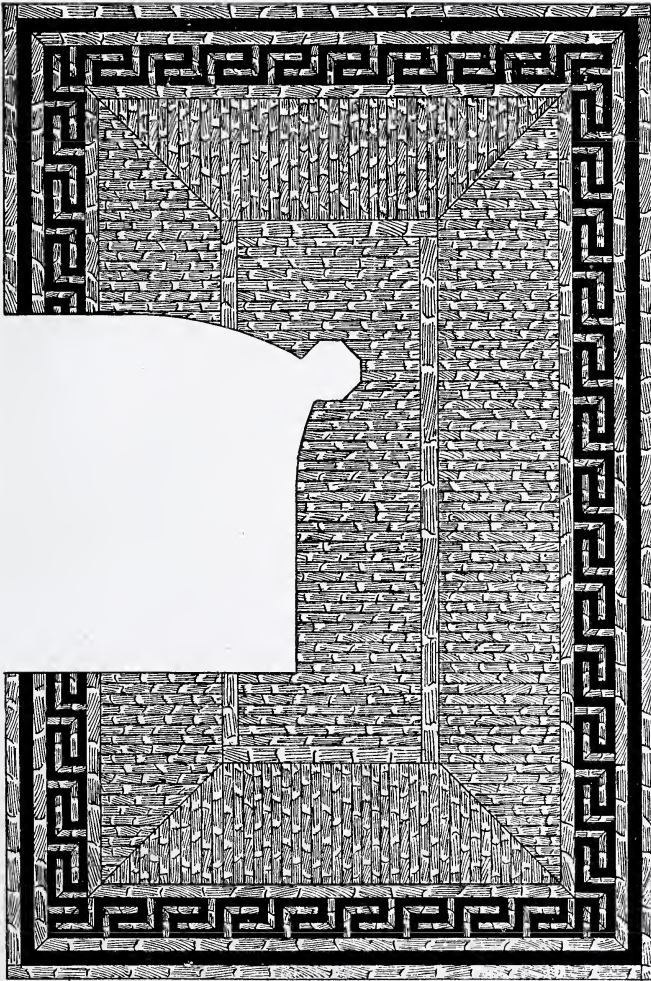

Plate No. 3

The above plan shows Wood Carpet center, with Border No. 93, 10 in., Oak and Mahogany, using a strip of 2-in. Cherry and one of 2-in. Oak at wall line.

Price per square foot.....27 cents.

The prices are approximate, but if you are considering the adoption of Hardwood Floors, send us diagram of room with dimensions, together with selection of plate, and we will give you net price complete.

For colors of wood, see pages 133 to 136.

For discount, see Price Guide.

Parquetry Floors.

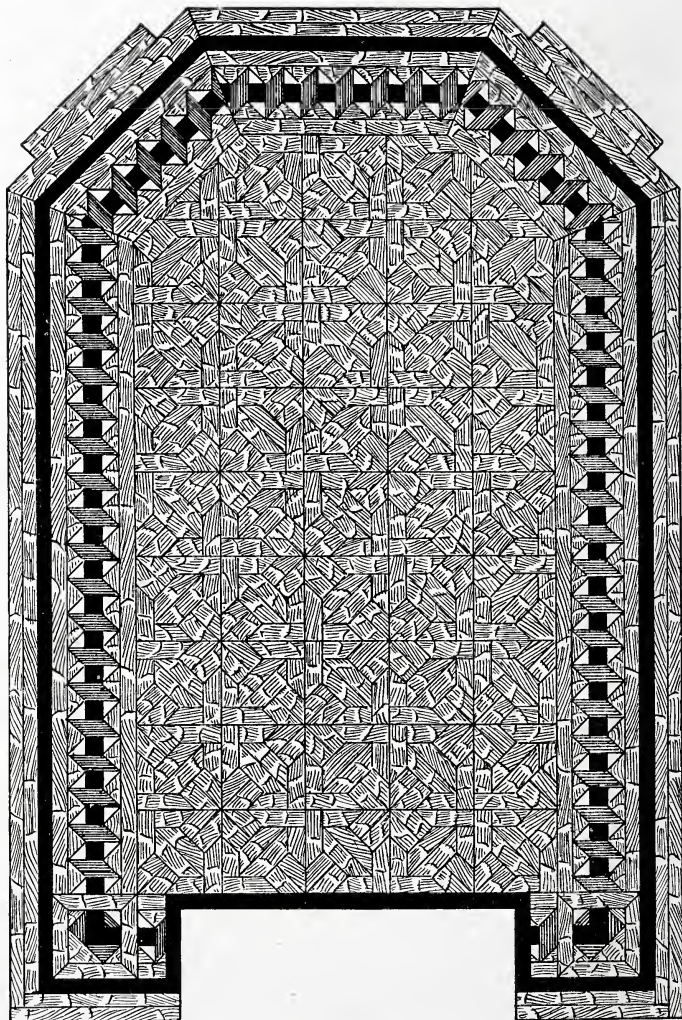

Plate No. 4

This plate shows Field No. 763, composed of Quartered Oak; Border No. 103, 12 in., Oak, Maple, Walnut and Cherry with 2-in. strip of Walnut and 4 in. of Oak at wall line.

Price per square foot..... 31 cents.

We furnish full detailed working plan for each floor, so that any carpenter or cabinet maker can lay our goods.

Parquetry is made $\frac{5}{16}$ in. thick, and is usually shipped in slabs 2 ft. wide by 4 ft. long, securely crated.

For colors of wood, see pages 133 to 136.

For discounts, see Price Guide.

Parquetry Floors.

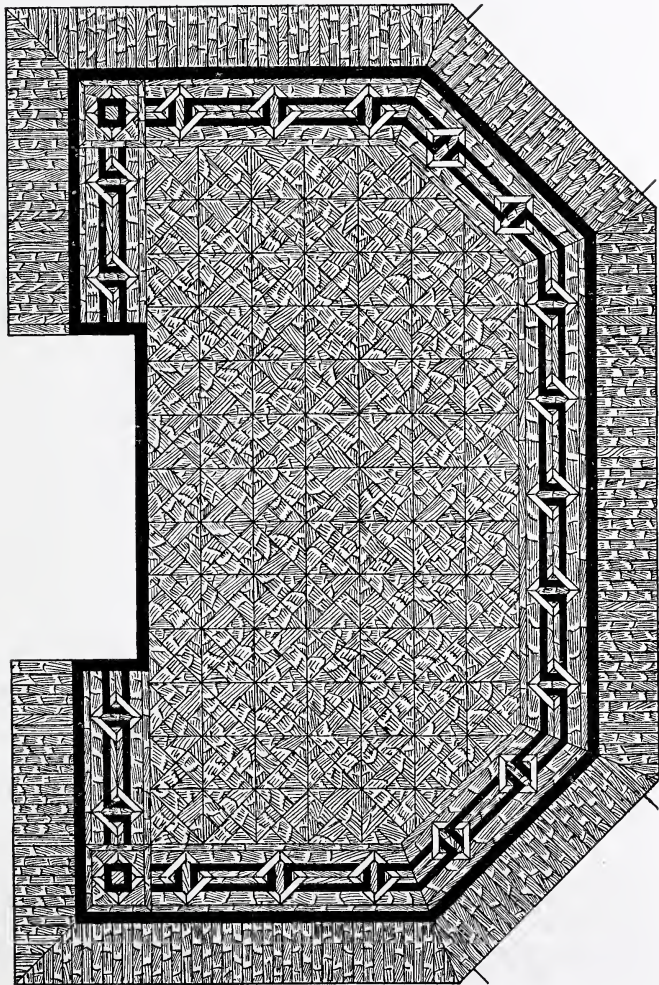

Plate No. 5

This plate shows Field No. 702, Quartered Oak; Border No. 92, 10 in. Oak, Maple and Mahogany, with $1\frac{1}{2}$ -in. strip of Cherry and 9 in. of Oak Wood Carpet at wall line.

Price per square foot.....28 cents.

Our Floors are adapted to any shape room. They are economical and healthful as well as handsome. No stains whatever are used in their manufacture.

For colors of wood, see pages 133 to 136.

For discount, see Price Guide.

Parquetry Floors.

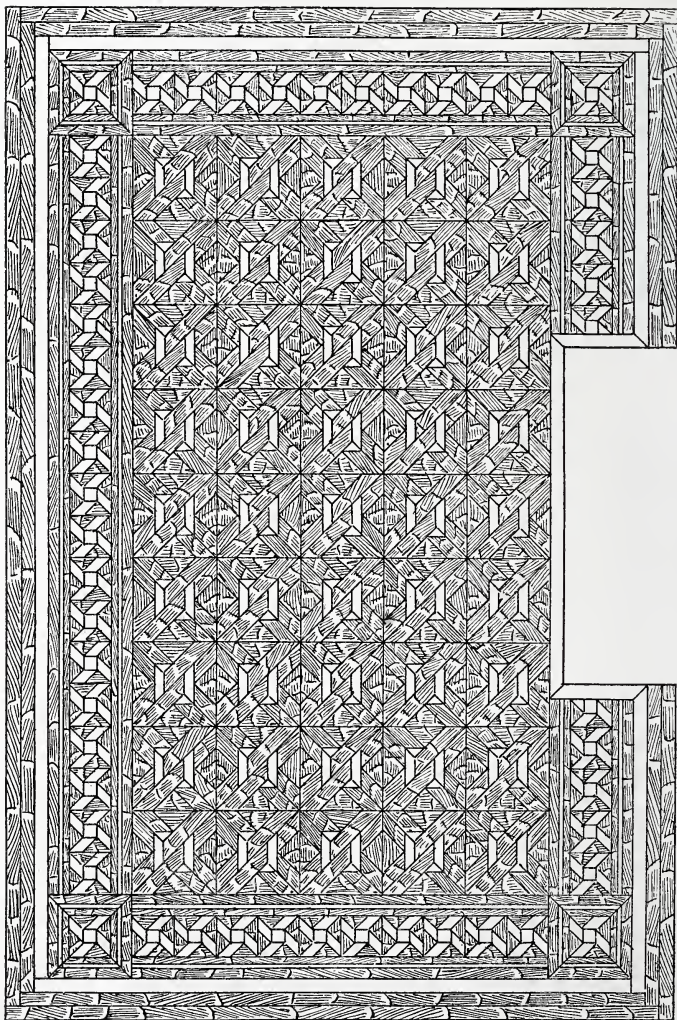

Plate No. 6

This plate shows Field No. 750, Oak and Maple; Border No. 115, 12-in. Oak, Maple and Mahogany, with 2 in. of Maple and 4 in. of Oak along wall.

Price per square ft.....30½ cents.

Hardwood floors are suited to any room, are best for all rooms, but are especially suitable for music rooms, dining rooms and halls in private houses. The best effects of music are lost in carpeted rooms. In fact, Hardwood floors are best for hard service.

For colors of wood, see pages 133 to 136.

For discount, see Price Guide.

Parquetry Floors.

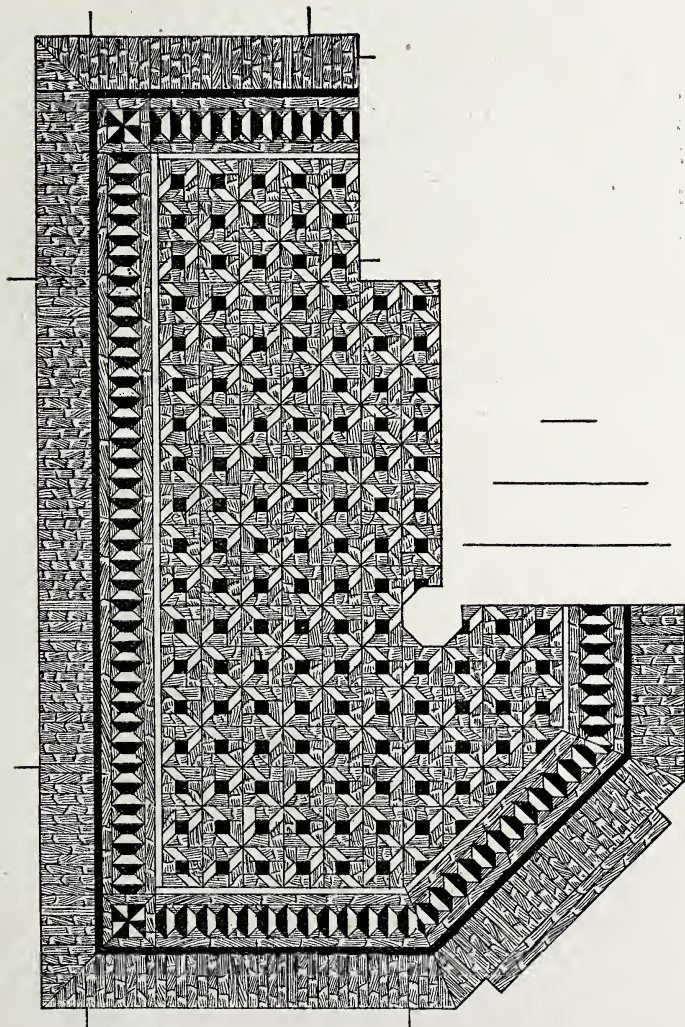

Plate No. 7

This plate shows Field No. 760, Oak, Maple and Mahogany, with Border No. 75, 8 in., Oak, Maple and Mahogany, using $1\frac{1}{2}$ inches of Cherry and 9 in. of Oak Wood Carpet at-wall line.

Approximate price, 35 cents per square foot.

Our Floors when laid are permanent and will last a life-time.

For colors of wood, see pages 133 to 136.

For discount, see Price Guide.

STORE DOORS AND STORE FRONTS.

We show in this section some new plain Store Fronts to meet the increasing demand. We have listed these plain as well as the more expensive designs, with the Doors, Sash and Transoms $1\frac{3}{4}$ inch thick, Posts, etc., in proportion, and you will note prices given are very low. It is impracticable to quote these Fronts glazed, on account of the fluctuating glass market, thus when in need of estimates on Store Fronts, including glazing, write for prices. In case of the openings stated not filling your requirement, we will make price proportionate. We are in a position to get this class of work out quickly. When ordering, it is best to send ground plan.

MOULDINGS.

We show on the following pages, 452 to 465, only such designs as are generally called for. The Universal Moulding Book shows quite a number of designs which are not called for, and hence it is not known which designs are considered Stock Patterns, whilst the designs we show are salable and can be furnished promptly.

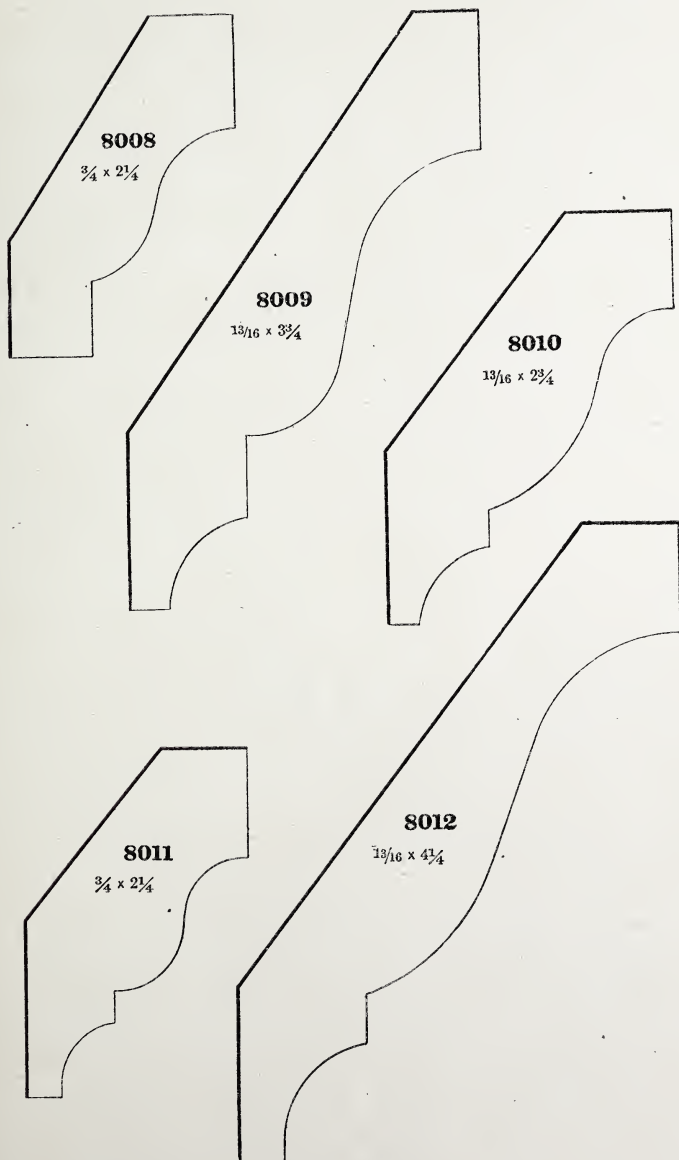

We have added a Telegraph Code (see pages 8, 466 and 467 this Catalogue) for the various numbers which you may use at our expense in ordering Mouldings for immediate shipment.

Crown Mouldings.
